

Proceedings

OF THE
COLLEGE OF UNIVERSAL WISDOM
YUCCAVALLEY, CALIFORNIA

A BRANCH OF THE MINISTRY OF UNIVERSAL WISDOM, INC.

A Non-sectarian and Non-profit Organization
for Religious and Scientific Research.

VOLUME 8 JANUARY - FEBRUARY - MARCH 1968 NUMBER 5

O' Man, in living My life, in breathing My breath, establish within yourself the solidarity, the contentment, the bliss of living rightly; that I may know, that I may feel, the glorious pulsation of the being of you. In speaking My words, let them ring clear, let them be dear and near to you, that others of My parts may understand.

Realize I am not the expression of self. I am the boundless unselfish utterances of the heart and soul, that lets you see the Me in others of My parts. None can bring about the working of My Laws, unless first they have established their right within My light.

Though some of My parts are disconnected from Me, I lose them not, nor do I separate the value thereof. For each I have given the right to choose their paths, within the being of Me.

Each moment, make your choice an expression of My love, so I may cool the flaming torment you have brought upon yourself. The fires within the you of Me cannot be cooled by throwing water on the smoke.

So stop and think, drink in the Me of you, then extend Me in the handclasp with another of My parts. In doing so, then you will know that I am there, and you will feel Me flowing back to you in the reciprocation of My ways.

Message from the "Golden Density".

RELIGION AND SCIENCE TODAY

Religion has always professed the intangible Deity. Science deals with many invisible intangible things such as electricity, magnetism, atomic particles, gases, gravity and space.

Most religions today are the philosophy carried down to us over the centuries. Many rituals used by the churches now, originated with the witch doctors of pagan tribes centuries ago.

Today the people need to understand their religion in a manner that fits the time of an atomic and space age. The church has failed to bring the ancient writings up to date. With increased knowledge and scientific ability, it is possible to explain many of the mysteries and miracles of the past.

Some of the churches are changing their dogma to more closely fit the accelerating changes of today, but mostly they are merging together to relieve the economic pressure of inflation and overhead.

Those who survive the chaos facing the world today will be mostly people who are not religious, or scientific in their training. The political and military people who survive could write a history of what happened after it was over, but their training would only permit their writings to explain events from political and military views.

None of Christs disciples wrote about what happened in His time, except Paul, who was the only one who could read and write. The most ignorant tribes of savages on the earth today have their stories of Noah and the flood, and Jonah and the whale. They never heard of the Bible, or the dogma of the worlds predominant religions. Neither can they read, or write. In spite of these failings they can discuss with each other what they see in a motion picture brought to them through science. It is a strange paradox that the more people are educated, the more gullible they are to propaganda that appeals to their inflated ego.

Religion, like life insurance, doesn't promise you anything until after you are dead. Science compels you to change with the times. Science is accelerating so fast that the people cannot be brought up to date fast enough in a technological sense. The church cannot interpret the old records of religion, in a modern way to fit the times, because their preachers, priests, and rabbis, have no scientific training in most cases. This makes it impossible for the church to give answers to questions asked by people in today's thinking. Science has a duty, to religion, to help them explain things in today's terminology. Religion must bring the verities of dogma up to date, or close their doors.

God made space, atoms, electricity, magnetism, and all other intangible invisible things before humanity had science. Science has advanced the use of these creations faster in the last 50 years than in all of the preceding thousands of years.

Yet the ignorant materialists in science propound the theory of human evolution without considering that the atomic elements are each the same in perfect order wherever they are found. Solar systems work by cyclic ordered principles, and the known universe is in perfect order - that could not exist except by creation from an Infinite Boundless Intelligence that knows all of the principles that science has not discovered yet.

Electricity and magnetism were here in Caesars time. Gravity existed on the planet since the planet was formed, long before egotistical men of degrees decided they are smarter than God. When science discovers each principle of nature, they take on the attitude that science created it. Science could not produce transportation, communication, or heat and refrigeration, without Gods rubber trees, gases, oils, iron ores, and other products taken from the earth that were not made by scientists. When science realizes that they couldn't do anything, with all of their brains and degrees of education, without a Supreme Intelligence making the materials and energies they use, then the scientists will have religion.

When religion recognizes that it could not propagate it's God to people without sciences making printing presses, paper and writing equipment; and today,

radio, television, telephones, photography, and motion pictures, then it must reciprocate to science for its part in manifesting Gods works in an endless production of Gods raw materials into parts, assemblies, and working equipment.

Each is lost in this latter time without the other. Science is the religion of manifesting Gods principles through materialism. Religion is the science of manifesting God through teaching of the intangible spirit. In todays thinking these things are chemical matter and spirit energy. These are the dual opposites of the same thing. Intangible electricity is everywhere, but without the matter of wire, coils, and cores, it cannot be manifest for use by science.

Science today knows the heart produces a magnetic field; an electric current is measurable in the blood stream. The body has electric capacity which can be demonstrated by the increase in reception on your car radio by touching the antenna. Every action of the voluntary muscle system depends upon electric impulses from the brain through the nervous system. Without the electrical function of the eternal spirit of you in the matter body, it would not respond, or perform any motion. Motion in matter can only exist when energy moves it.

God is the infinity of an endless electrical universe that thought atoms, solar systems and galaxies into being. Humans are thought forms of Gods creation of individual forms of life. When "God created man in His image" He didn't mean we looked like Him. He meant we had the power through imagination to create like Him through thought. The designer of anything pictures the design in the mind and through thought puts it in blueprint form on paper, from which it is made as a tangible physical product. This is a product of science.

Religion is the effort of trying to understand this invisible energy from which the thought came. If the intangible invisible thought produces a tangible physical thing, this is accepted as science.

If tangible physical things reverse this process, to understand this Intangible Infinite Mind, this is Religion. Both are valid opposites of each other, but it is time to stop being opposites to each other. Unless this is realized, religion cannot survive in an advanced scientific age. If science does not accept the moral responsibility it professes so ardently, it will destroy itself, without religion in its acts. We have a scientific computerized hydrogen bomb planet because science became as materialized as the matter of their science. They forgot the God of their image to create and are manifesting the Devil of their ability to destroy.

Religion failed to keep pace with the changes in human thinking and the division widened, with science, until today they are not accepted as two hemispheres of the same sphere. Religion cannot be accepted by the space age people when it teaches the Fatherhood of God and it cannot manifest the brotherhood of man.

Both Science and Religion have gone beyond their limits as established by God in giving man "dominion over all things", for they are demonstrating the dominion over man; and God never gave man dominion over his fellow man.

So now the God created law of reciprocation is going to destroy them both, because religion didn't perform its function far enough, and science went too far beyond its limits to create, and swallowed its own tail.

WHO WILL ANSWER THIS ONE?

The Ministry is in need of a good used car. Transportation in our location is a vital necessity. If someone wishes to donate a car and will send us the signed pick registration slip, we will send someone to drive it here.

PROPHECY

Mathew, chapter 24, gives the prophecies of Christ. These prophecies have already come about in this generation up to Mathew 24:27, and those are yet to be fulfilled up to Mathew, chapter 25. Some of these acts are apparently occurring also, but the multitudes are not aware of it.

Hebrews 13:2 says, "Be not forgetful to entertain strangers: for thereby some have entertained angels unawares."

First Peter, chapter 2:12 says, "Having your conversation honest among the Gentiles: that, whereas they speak against you as evildoers, they may by your good works, which they shall behold, glorify God in the day of visitation".

Remember how many have been spoken against, or ridiculed because of their profession that they were visited, or contacted by people not from the earth? Now because of the increase in the number of sightings, by millions of people, the ridicule has ceased.

Isaiah 3:5 says, "And the people shall be oppressed, every one by another, and every one by his neighbor: the child shall behave himself proudly against the ancient, and base against the honourable".

Can riots, crime increase, hippies, and juvenile narcotics users be better prophecied?

"Woe unto them that join house to house, that lay field to field, till there be no place, that they may be placed alone in the midst of the earth." Isaiah 5:8.

Can prophecy better describe the housing tracts, where one can run and jump from roof to roof right down the street from one house to the next? Where crops are infected because they adjoin their neighbors field so closely? Where 97% of the population of this country lives on less than 2% of the land in the congestion of cities?

"The harp, and the viol, the tabret, and pipe, and wine, are in their feasts: but they regard not the work of the Lord, neither consider the operation of his hands". Isaiah 5:12.

Does this describe the jungle rhythm of combos, guitars, and the racket of what is played as music today by longhairs and hopheads?

This summer will be different than last summer was. The riots and burning of cities last year were insurrection against the law. This summer the law will be in the middle between the people, who will be killing each other. Summer of 1968 will also have both heat and cold records broken all over the world. Fruit prices will be out of reach of many people. Both droughts and excessive rainfall will wipe out many crops. National leaders will be publicly calling each other names. The political field will have you so confused you will wonder what to do. Several astronauts will die. Inflation will cut your buying power. Several major air crashes will kill hundreds of people. The military crisis will continue to spread and grow more critical. Bank robberies will break all records. It will appear at times that there are no law enforcement agencies. Ration stamps may be issued for certain items. Several churches will merge to survive. A major city will suffer great damage by earthquake. Top men will be replaced in three nations. The stock market will go wild.

This promises to be the year of great changes and much confusion and contradiction.

APOLOGY

We want to apologize to our readers because we have been so long between issues. Holidays, business, weather, maintainance and much work seemed to force the "Proceedings" to take a back seat in our activities here. We do want to thank our many friends who assisted us through this period of confusion.

THE "INTEGRATRON"

One of our loyal readers, whom we met in 1956 on a lecture tour, has just mailed us a check for \$5,000.00, to be used on finishing the "Integratron". By the time you receive this paper through the mail, it will be spent on equipment, materials, and overhead. A recent purchase of teflon material to complete the bearings for the large armatures, cost \$837.00 alone. We estimate that the completion of this apparatus will involve another \$60,000.00 to \$100,000.00, depending on how fast we finish it. The larger amount will finish it in half the time that the smaller amount will.

This same person wants to help us finish it sooner. In a second letter from her, just received, she now says that she will send another check for \$5,000.00 when others respond to fill in the difference required to finish it faster.

She challenges our supporters to match this amount, or better it. We want to thank her for the active response to her inspiration. Who will pick up this challenge and be equally inspired? Smaller amounts according to your means will also add up you know. We wish to thank all of our faithful friends who have made it possible to carry this God given project to around 80% of completion.

BOOK REPRINTED

"The Council of Seven Lights", written by George W. Van Tassel, is now being reprinted. It will carry the new title of "Religion and Science Merged".

This book is copyrighted by the Ministry of Universal Wisdom, Inc., and all proceeds from its sale go into the treasury of the Ministry, as a tithe from the author.

You can order this book directly from us for \$3.50. It will be available by the time this "Proceedings" reaches you.

SCIENCE, SECRECY AND SATAN

Only 100 years ago, if anyone would have said it would be possible to dial an instrument and talk to anyone thousands of miles away, the strongest skeptics of that time would have been the recognized scientists and authorities. Now this scientific achievement to telephone over great distances, is accepted by everyone as a fact.

Back in Moses time, scribes tried to record events that happened then with no knowledge of magnetism, electricity, or scientific know-how. The events that occurred in those days, when animals were their best means of transportation, were events that are not fully explainable by our present day experts.

Authorities, and men of letters and degrees today, are just as confused relative to what is happening in our time, as the scribes and people were in Moses time. If recognized experts today don't understand anything outside of their educated limits of specialization in science, or theology, then it is taboo, the figment of someones imagination, or to be ridiculed. Naturally, the un-specialized, follow the leader multitudes, believe what the experts say.

Back in Moses time, anything that occurred beyond the understanding of the people, was either an act of Divine nature, or the work of the devil, depending upon how the men of letters and authorities interpreted the event.

Just because the present science and civilization has advanced from the horse and buggy, to men in orbit around the world, doesn't change the conditions of the rest of the limitless universe. The scribes of Biblical times, recorded what happened to the best of their ability to express it.

Websters dictionary of the 1890's described an aeroplane, "as a heavier than air machine that some people foolishly thought would fly". Seventy years later, we fly thousands of tons of people and parcels across the oceans and continents every day. This is a fine advancement; from the horse and buggy, to men in orbit around the world, in one generation of people.

This doesn't mean that everyone understands space mathematics, or the complexities of television, just because they live in this generation.

"The work of the devil" in Moses time was due to ignorance. Today it is hidden by the "credibility gap". Regardless of what you call it, it is the influence of the few, who know the answers, trying to keep the many from finding out. This goes on today in politics, science, education, and the churches. Only those few who accept the subversive pattern of thinking, and action, are accepted into the closed circle, to carry on this power hungry plot.

The only education of factual reality is experience. The science of Robert Fultons time cannot compete with todays science any more than todays science can compete with a world it has destroyed in the near future. Survival of the fittest will then override all the degrees of education, all the piety of the churches, and all of the power of the few over the many. "The first shall be last and the last shall be first". Mathew 19:30.

The race of Man, in space, is as far above the human race, as the human race is above the lower animals. The Bible is the record of the acts of the space people. They have landed on this satanic planet throughout history to upbreed the people and bring their philosophy here through "holy" writ.

This year, 1968, is the beginning of the end of this so-called civilization. The astronomers are withholding the facts from the people relative to the earth's changes in the solar system. Governments have reached the end of their ability to control the economy sucked dry by profit and interest. The military have stockpiled enough destructive weapons to wipe out this humanity many times over. Law enforcement has been subverted by the courts until a policeman is afraid to act because of legal retaliation. Geophysical reactions are increasing in their destruction and frequency. The coming generation is being drugged physically and spiritually. The victim of an accident is murdered so her living heart can be put in a dying man. Biologists are trying to create animal matter chemically with success all ready achieved microscopically. "God is dead" according to the atheists and prayer is illegal according to the courts.

One doesn't feel sorry for the ignorant masses. One has to feel sorry for the minority who know better and defy God by being instruments of the satanic influence.

"For it had been better for them not to have known the way of righteousness, than, after they have known it, to turn from the holy commandment delivered unto them". Second Peter 2:21.

Why are large corporations, newspapers, and railroads merging together? Why is there no space program planned beyond the Appolo series? Why are the military forces being scattered over the earth in strategic places? Why are top industrialists being gathered near a hollowed out mountain bomb shelter? Does this look like "the latter days" of Biblical prophecy?

"For nothing is secret, that shall not be made manifest; neither any thing hid, that shall not be known and come abroad". St. Luke 8:17.

Secrecy is the most essential tool of those who act against God and nature. Security is the stamp that hides all unnatural acts and plans of scientific destruction. This destructive power is in the control of political people who are being pushed into dead end streets by the reaction to their actions. Now they have no place to go and must use their destructive powers as the only way out.

Satanic influences are so subtle in their creeping approach that most people in authority don't know they are taken in until it is too late, then they try to hide their destructive ways by crying Peace, Peace, and profess that all of the destructive weapons are for defense and freedom of the world.

"We looked for peace, but no good came; and for a time of health, and behold trouble!" Jeremiah 8:15.

SERVICES

We want to remind our readers, that the Ministry religious services are held in the restaurant building at Giant Rock Airport, every Friday at 8:00 P.M. Giant Rock is north of Yucca Valley, California.

SPIRIT, ELECTRICITY AND MATTER

We have long contended over the years, in the "Proceedings", that the "spirit" of religion and the "matter" of science are merged.

Medical science has now discovered and verified our contention. In an article printed in the Los Angeles Times of November 26, 1967, on page 15 of Section D, the following data was revealed.

Under the heading "New Finding of Energy May Aid Heart Patients", doctors doing research at the University of Maryland revealed the following findings and we quote from the article.

"Discovery of an at present unidentified electric power supply in the blood stream of a living animal could revolutionize the design of the electronic pacemakers implanted in certain patients to regulate and stimulate the heart beat.

The discovery was made by a team of research scientists from the University of Maryland.

Their preliminary experiments indicated that sufficient energy was produced from this source to provide the power for a pacemaker.

The leaders of the team, Dr. Adam Cowley of the school of medicine and Dr. Mostafa Tallat of the mechanical engineering department believed the new source of energy could provide a permanent, reliable power supply.

Pacemakers at present in use, usually run on small batteries inserted near the patients heart. These need periodic replacement - and a surgical operation to do it.

Commenting on their discovery, Dr. Cowley said 'battery systems are just not adequate. They are supposed to be good for five years, but most do not last two years and are unreliable even before then'.

In a statement released by the University of Maryland, Dr. Cowley said that finding sufficient energy within the body itself would be a 'great asset to medicine', not only for pacemakers but also for 'future electrical devices in the body'.

In the healthy human heart, a sheaf of nerves and muscle sends out a tiny electrical impulse which stimulates the powerful heart muscles, squeezing oxygen-laden blood throughout the body.

More than 10,000 Americans today owe their lives to artificial pacemakers which help supply that tiny, all important impulse.

Dr. Cowley, Dr. Tallet and their team achieved their results by placing one electrode in a dogs heart and a second electrode outside the heart, in various combinations.

'In each case, a sustained power level two to four times that needed to power a pacemaker resulted', the university statements on the experiments said.

Although they were not sure precisely how the electric power was produced, Dr. Cowley and Dr. Tallat believed they have found a 'truly biological electrical power supply'."

Underlines of words in the quoted article are ours.

First Corinthians 15:44 says, "It is sown a natural body; it is raised a spiritual body. There is a natural body, and a spiritual body".

Medical science is finding out that this physical biological body is powered by the electrical spirit body. When the electrical spirit body departs from the chemical physical body, the matter body dies. The electrical spirit body is eternal because you can't kill electricity.

The physical body rejection of organ and heart transplants is the result of the spirit body rejecting a part that it didn't assimilate to itself in the spirit electrical frequency and vibration of the person.

People are electrically, or spiritually as different as their fingerprints. Matter and energy are opposite poles of the same thing. Matter can be converted into energy and energy can produce matter. The energy electric spirit body assimilates the matter physical biological body from the earth through food, water and air.

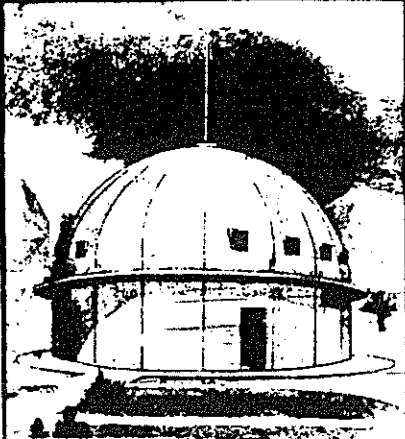

The legs of dead frogs can be activated by electrical currents to its nerve ends. This same principle is used in the heart pacemakers. You are electrically powered by the spirit which is you. Every sensing in the physical body is electrical. There are spiritual, or electrical senses beyond the five mis-named physical senses of sight, taste, touch, smell, and hearing. There is the sense of feeling. This sense normally makes one blush when they are embarrassed. This is the sense that makes you know that you are, the sense of being. This sense can be expanded through silence, or meditation, and practice in this respect will make you more intuitive. Extra sensory perception, called E.S.P., is not extra in any respect. It is only more developed in some people than in others.

A sense of time also exists in the spirit electrical individual. This makes it possible for some people, using this time sense, to awaken at a given time without an alarm clock. The spirit knows the time and awakens the physical body by reversing its polarity from the back to the front of the brain. This too has been demonstrated by science with sleep machines.

The limits of the physical body are the limits of physical matter environment. The spirit, or electrical body has no limits, that is why it is infinite and eternal.

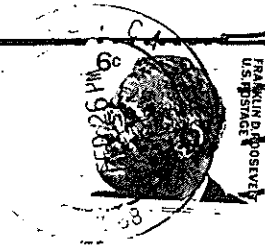

We hope science continues to discover the unlimited extent of religion, and that religion finally recognizes through science that it can measure and record the eternal forces of life in the flesh.

"PROCEEDINGS"

This issue of our paper brings us into the fifteenth year that we have been printing it. This corporation paper is mailed world wide and involves many days of work by our staff to compose and mail it. If you have not yet sent us your Zip Code, please do so. If we have it in our file, you will find it used on the back page in addressing this issue to you. If yours is not on this issue, we do not have it. Please respond to this request.

NOTICE

If this issue of the "Proceedings" has an "X" written in ink, in front of your name on the last page, it is because our files indicate you have not made a contribution to the expense of printing and mailing it to you for at least two years. It will be necessary for us to put your file card into our inactive file unless you respond to this notice. In this event no further issues of the "Proceedings" will be mailed to you. We hope each of you will remain on our active file as we like to hear from you.
