VOLUME 9 JANUARY - FEBRUARY - MARCH 1972 NUMBER 9

O mortal man, each part I limit in the destiny of My doing. I place the boundary on your skin. The bark of tree, to limit Me within the life of each of My created beings. I place the limits on the speed of rivers to the sea. I place the limit on the height, or every tree would grow unbounded. Though the bone may fracture and skin may carry scar. Though all My species bear the marks of time within their destiny, I control the limits of My parts, or else My parts would have control of Me. And though the barriers of confinement hold My creatures in the form, and though one looks to distances beyond the furthest sea, I limit all My beings, except for one direction, which is within to Me.

If you would reach another, to ease an aching heart, you must forget the past, for the present has at last released the light to thee, of Me. The future destiny makes thee one with Me. O mortals, though you search for Me within the blazing sun, you must reverse the course. The race is never won, though the reflection reaches the finish first. The light that is My track was there before the race began.

Message from the "Golden Density".

Eighteen Years In Publication

THE PYRAMID PRINCIPLE

Orthodox science is now beginning to find that the energy we have been writing about for 18 years, really exists. In the scientific research conducted by Dr. Luis Alvarez, who won the Nobel prize in physics in 1968, standard scientific principles were used. The idea was that cosmic rays passing through the pyramids would reveal any chambers that have not been found yet. A cosmic particle recording device would show less loss of energy on passage through a hidden room than it would through solid stone. This research involved several institutions as well as governmental agreement between both the United States and the United Arab Republic.

Magnetic tapes, which recorded the data, were run through the most modern computer to analyse the results. The tapes revealed that a pattern could not be established from which to establish a stable zero point of reference, and every time the tapes were re-run, they gave a different pattern of readings. Not only were the patterns different, but certain data disappeared from the tapes. The final conclusion was that what was occurring was not only impossible, but some energy was being registered that does not conform to the laws of science.

Vern Cameron, of Elsinore, California, was conducting experiments 30 years ago in order to try to understand what this energy is that does not conform to known scientific laws. Vern found out that meat could be preserved for an indefinite period of time, after being subjected to this unknown energy generated by a small pyramid. He also found that a razor blade could be used to shave with over a hundred times, before it lost it's sharp edge, when placed under his small pyramid.

In collaborating with Vern, we not only verified his results, but also found that an egg in a saucer would solidify under the pyramid in a week, while one outside of the pyramid in a saucer remained fluid. Milk kept in a carton with a pyramid shaped top will also keep fresh for an indefinite period of time without refrigeration. This is now patented in France where cartons are used for dairy products.

The common denominator in all of these findings is that the shape induces the energy. It must be a four sided pyramid, and the most energy results from a 52° angle on the sides. The most powerful results are obtained when the pyramid is oriented with the sides parallel to north, south, east and west directions.

Tests we have conducted, over the years, prove that the corners are the operational necessity as holes cut in the sides do not detract from the generating force. Another point that we discovered, is that in order to achieve maximum energy, the pyramid must be fastened down, so it cannot be disoriented. The maximum energy requires 28 days, one magnetic month, to reach it's peak. We also discovered that a quartz crystal peak on the top, where the capstone should be on the Giza pyramid, will produce other effects. We believe that a laminated quartz condenser, with germanium separating the quartz sheets, on top of the pyramid will produce energy readings on present scientific instruments. Due to lack of money, we have not been able to conduct other tests that should produce electric power for use.

It is our firm conviction, after years of analysis, that the Great Pyramid of Giza, was used to produce power, used for rejuvenation, used to make mummies, used to restore life, and used as a launching power to start space ships out of the earths gravity.

One of our associates in Park Ridge, Illinois, has accomplished levitation with single pyramids and a group of four pyramids. She has established a "norm" where the point of levitation of either hand will occur. She has established that some of the charge will remain for a period of three days; and that from the original point of first levitation, that the time diminishes from 7 minutes and 45 seconds, down to 45 seconds in five exposures. She also discovered that "dowsing rods" activate over the pyramid in the lowest level of her home, and activate equally as strong upstairs in the highest level of her home. This same associate also discovered ancient Hebrew and Greek root meanings to words in the bible, which we printed in the "Proceedings" ten years ago, do translate into modern English meanings. We printed this in offering a comparison between our "Integratron" and Mose's Tabernacle.

Capt. Bruce Cathie, in his first book "Harmonics 33" and in his second book, "Harmonics 695" shows by physical proof and mathematics that the power grid system of

the earth involves the Great Pyramid and the Stonehenge circle in England.

Application of "natural power" can be used to increase crop growth, eliminate destructive insects; used to diagnose disease and the treatment of it; used for interplanetary communication, the preservation of food, a power source for transportation and other things too numerous to mention. The only requirement to use this "free energy" is our ability to couple into it, store it and transmit it. First of course it must be accepted by the scientists, and an economic system of exchange devised to permit it's use. These two requirements are the barrier which loggerhead profit and power hungry opponents will not accept to make a "heaven on earth" possible.

In the drawing reprinted here, from the "Proceedings" of February 1, 1954, we show the shaft of power and the vortex which the shape and mass of the pyramid produces.

The builders of the Great Pyramid had to know science beyond our present knowledge because the Pyramid measurements incorporate the speed of light, the mass of the planet, the acceleration of gravity, weights and measures, the axis of polar rotation, the distance to the Sun, the 26,000 year procession of the equinoxes, the Earth's magnetic field, the Earth's orbit around the Sun, the value of trigonometry, and latitudes and longitudes among many other things.

The stones in the Great Pyramids structure weigh up to seventy tons. Granite was used to encase the Kings Chamber because granite produces a "piezo-electric" effect due to the matrix of quartz crystals, mica, and feldspar. The bulk of the pyramid of Giza is limestone which has no electrical ability. The granite chambers above the Kings Chamber form a granite air condenser for energy storage. The Kings Chamber was built off center purposely to place it in the power area of the energy generated.

On the Great Seal of America, printed on the one dollar bill, we see the pyramid with the capstone removed upward. In the center of the capstone is the all seeing eye and the capstone is surrounded with the radiance of power. The spirit is supposed to go upward at death. Pyramids apex upward as do cones and church spires. Coils are spiral. I.R.I. in spirit is

the same as IRIS in the eye. The centering focus of all seeing, light, and energy. Pyramid means fire, or light, in the center. The word "spirit" comes from the Latin Spirare. Spire is "a body that shoots upward to a point". The Accadian word Pir, or Bir meant light.

All of nature spirals. Spiral nebula, spiral vines, spiral rising smoke, spiral water running down a drain. The structure of cells in a hair are spiral, the D.N.A. of life is spiral, as are coils to activate magnetism in the cores. Pir-a-mid is to activate light energy in the center.

If you look at the Sun in the morning as it comes up, you will see a spiral cone shape surrounding it. This is the same spirit energy the pyramid generates which the ancients called the "Shekina Glory". Electricity, magnetism, and gravity, are side-effects of spirit energy.

The pyramid was called K-HU-TI by the Egyptians, and K-HU in Egyptian means "The Luminous One". HU is HUE now, meaning a mixture of colors.

One of the peculiar puzzles, to those who have spent any time in the Kings Chamber, is the intense bone-chilling cold that is felt, like it was inside of the body.

In the secret alchemy of The Emerald Tablet, the "formula of life" and the mathematics of the "mystery laws" apply to the Great Pyramid. The four elements, fire, water, earth, and air coincide with the four faces. The three principles of alchemy, circulation, fusion, and spagyric equasion are parallel to the three sides of the triangular shape of each face. The reciprocal action in a living instrument produces Universal Harmony, or life energy.

The sarcophagus follows the "Node of Nature" which doubles the cube, and produces cubical crystals in gold, silver, and salt.

We are anxious to apply the pyramid principle to make a refrigerator. We believe a two story high pyramid with a conveyor belt feeding it through one side, would shrink city garbage to one-quarter of its volume and could be shipped dry as a land mulch to agricultural areas.

A pyramid shaped top on a storage shelf for food, open on all four sides, would preserve fresh foods and fruit without refrigeration. These principles have already been proven on a small scale.

Resonance of any object depends on its shape, the same as the shape of an airfoil must correspond to the airflow in order to prevent resonance. Resonance is the reciprocating action in spirit that makes things live. In matter and physical things, resonance can be in discord and cause things to break. This has happened in the construction of new buildings, where the city noise and traffic have caused buildings to collapse because the structure in steel was a framework of cubes. A resonance that might be in harmony with a sphere might also be in discord with a cube. Shapes are a science in themselves, long ignored by scientists. Ancient symbols are each a separate scientific principle of applications of energy for different purposes.

The pyramid principle of power will create a "Cube of Infinity", a "Cone of Silence", a "Capstone of Eternal Youth", a "Sarcophagus of Preservation", and a "Vortex of Cosmic Power". The transmutation of matter can also be accomplished with the pyramid power.

It was found that the mummified flesh when ground to a powder and taken internally served as a cure-all for all internal ailments and caused broken bones to heal back together in a matter of minutes. Therefore mummy matrix was a common cure and sold in apothecary stores. The energy that caused the body to mummify was stored in the flesh and was the potent healing agent.

Those of you readers who are interested in conducting tests and making pyramids should remember that the critical thing is to make the sides on a 52° angle. The best size is around a foot to 18 inches high. The pyramid can be made of cardboard, hardboard, metal, plastic, or any other material. The corners can be attached with tape, or glued. Holes can be cut in the sides without affecting the energy. The pyramid should be fastened down on a fixed shelf, or bench, with the sides oriented with a compass. The east and west sides should be parallel to north and south.

If a series of pyramids are used and a wire is run from the top of one to another with the end wire running to a coil wrapped around a piece of iron pipe, it will be possible to direct the energy in a cohesive beam, like laser, to an undetermined distance. The beam can be turned, like light, by reflecting it off of a mirror. A plastic tube should be slipped over the coil and pipe. Winding spacing and wire size are not critical. The wire should be insulated. We would be interested to see what this beam does when run through a prism.

There are an unlimited numbers of tests that can be done which haven't been tried yet.

We believe this energy which responds to some optical laws and some electrical laws, will be the energy that replaces atomic, and fossil fuels for the ultimate power for all purposes.

We are working on an instrument which will detect and measure this energy.

RECOGNITION AND HONORS

The Board of Directors, in the monthly meeting of January 19, 1972, have agreed unanimously to recognize and honor, those of our donors who help to speed the completion of the "Integratron" up the "home stretch".

It has been decided to place a brass plate, on which the donors name is stamped, around the circular cement base of this giant machine, to stand for all time and show that they are the foundation of this humanitarian project.

Their name will also appear on a list, under glass, on the front of the office building in honor of their beneficent contributions.

It was agreed that anyone who extends a gift of one hundred dollars, or more, will have their names behind the glass and on their individual brass plates around the base of the "Integratron".

We sincerely thank those of you who have brought this project up to approximately 83% of being completed.

World's Greatest Power Plant

THE GREAT PYRAMID

The Great Pyramid* of Gizeh, Egypt, is the only existing structure on the Earth that remains intact after 25,816 years. It is the greatest power plant ever built on this planet. At the time of its use it could furnish more power than the generators at Niagara Falls could produce in a thousand years.

THE FALL OF BABYLON

If we follow the prophecies of the Bible, in Revelation, we are in the last two years of preparation before the "war involving all Nations".

Revelations 17:1 says, "And there came one of the seven angels which had the seven vials, and talked with me, saying unto me, Come hither; I will shew unto thee the judgment of the great whore that sitteth upon many waters". Revelations 17:15 says, "And he saith unto me, The waters which thou sawest, where the whore sitteth, are peoples, and multitudes, and nations, and tongues". Revelations 17:3 says, "So he carried me away in the spirit into the wilderness: and I saw a woman sit upon a scarlet coloured beast, full of names of blasphemy, having seven heads and ten horns."

The seven heads has always been interpreted as being the seven hills on which Rome is built. The ten horns are, according to Revelations 17:12, "And the ten horns which thou sawest are ten kings, which have received no kingdom as yet; but receive power as kings one hour with the beast."

The alliance usually referred to as "The European Common Market" is officially called "The Treaty of Rome." On January 21, 1972, four nations, Denmark, Norway, Ireland and England were accepted into the "common market". This completes the ten nations required in order to fill out the requirement of the record in Revelations.

Since the "wage-price freeze", which we predicted in the "Proceedings" of July-August-September 1969, on page 14, people are beginning to realize that there is a critical money situation throughout the world. The "common market" is an anti-American alliance to gain control of the world trade economy.

Great Britain in joining the "Common Market", abandoned her role as "The Mother of America", clear across the ocean, for closer bedfellows in Europe. This was partly based on the business sense that the U.S. now has only around \$10,500,000,000.00 in gold and owes foreign nations around five times that much.

In other words we have gone broke financing the rest of the world and fighting two "no win" economic wars in Korea and Vietnam.

The "Common Market" has a population sales value of well over 350,000,000 people in the Unified States of Europe's ten nations. This is more buyers than the United States has, and more than the Russian Alliance of Nations has.

This makes the "Holy Roman Empire" the greatest power in the world. To this aggregate of nations in Europe the U.S. is only a poor cousin, with a four hundred billion dollar national debt, around six million unemployed, and about fourteen million people on welfare. How did we get this way?

Well, it started with "The Federal Reserve Act", in 1913. This act was to make possible the flow of credit and money. This is the downfall of nations and individuals - CREDIT. Credit is a system of buying the invisible infinite illusion of time. Time is the thing you pay interest, and carrying charges for, and get nothing in return for this money.

Money was a medium of exchange until President Wilson signed this act. After 1913 money became a commodity. This commodity was what World War I, and World War II were fought over. World trade is the life blood of nations. Now with the "Common Market" the U.S. will be a "Poor Richard" nation. Being No. 2, after being No. 1, is a hard pill to swallow. What does Revelations, in the Bible, say further about this?

Revelations 18:21 says, "And a mighty angel took up a stone like a great millstone, and cast it into the sea, saying, Thus with violence shall that great city Babylon be thrown down, and shall be found no more at all."

The "great city Babylon" represents the Babylonion money system, where money is a commodity to make more money on. It has been in existance as an interest, and usury, system since the time of Nebuchadrezzar, but was not an international system as such until 1913.

The present trade war between Japan, West Germany, and the U.S. was a touch and go triangle, in which none of the three could tell when the other two of them

might gang up on the other one. This made it necessary for each of the three to pacify the other two constantly.

Now since West Germany has nine partners, with tariff-free borders, Japan has no choice but to join up with the United States. This is evidenced by the meetings between Nixon and Sato and Japans agreement to buy Alaskan oil. The collateral of the nations is oil. The whore is money, the beast is power.

This now becomes a battle between the beast with the ten horns and the rest of the world in an economic battle over world trade. This is again the formula for war on a large scale. The rest of the nations of the world are now forced to join one side or the other. There will be no fence sitters.

Oil runs the world. Japan and Great Britain have to join up with their closest sources of oil supply. Both being islands, they have to import their oil or collapse as nations of power.

Satan cannot stand against Satan, anymore than Catholicism can stand against Protestantism. Each would be defeating itself. Most of the heads of nations are pawns in the process, who have to do what the economic whore says, or she will turn the power of the beast on them.

Revelations 18:15 says, "The merchants of these things, which were made rich by her, shall stand afar off for fear of her torment, weeping and wailing."

In tieing up the Suez Canal, the world trade had to shift and old enemies had to become buddies. Two Pacific Coast dock strikes put the pressure on Japan, as it is too far around Africa with the Suez Canal blocked to profitably sell to the European market.

This is a checker game between the nations in a strategy to keep the economic whore from going hungry.

Jeremiah 51:58 says, "Thus saith the Lord of hosts; The broad walls of Babylon shall be utterly broken, and her high gates shall be burned with fire; and the people shall labour in vain, and the folk in the fire, and they shall be weary."

This prophecy says the economic system will fail and there will be no money to pay labor.

This whole fiasco is the result of a money-mad, power-hungry world slowly making the wrong moves in the checker game of life; little realizing that sooner or later the rules of the game require that one opponent shall lose, when the laws of God jump all of the checkers.

God made the laws of equal exchange. An abundant life is the profit, not undermining others on the way. Glory, is the feeling of self satisfaction in helping others, not the raiment of riches and power.

If I lived in a major city and had the money, or property to sell, I would be making fast tracks to move before it is too late.

Revelations 18:4 says, "And I heard another voice from heaven, saying, Come out of her, my people, that ye be not partakers of her sins, and that ye receive not of her plagues."

E Pluribus Unum

NEW BOOK

Many of our readers have written to ask when the book, "The Stars Look Down", will be available.

This book is the "meat" of 17 years of the "Proceedings" compiled under one cover.

Our printers have given us an approximate cost for printing of \$3000.00 for 4000 copies.

The book sales would provide an income for the "Integratron" research from the difference in cost of printing and the sale price.

I have dedicated this income to the Ministry, as a tithe, and will print the name of any donor in the book, who makes the printing possible.

George W. Van Tassel

BOARD OF DIRECTORS

The Annual Board of Directors Election was held on December 11, 1971. It was voted that the present Directors would continue to serve another year.

Leo Lefebvre was added to the Board as an Associate Director by unanimous vote.

The Board of Directors is now composed of the following people:

George W. Van Tassel - President
Nathan D. Councilman - Vice-president
Darlene J. Wing - Secretary-Treasurer
Mary Councilman - Office
Herbert Kelley - Superintendent and Maintenance
Eva Van Tassel - Social Director
Sandra Boone - Office
Elsie Jacobsen - Public Relations
Olive Kelley - Assistant Social Director
Leo Lefebvre - Associate Director
W. Paul Wilson - Scientific Consultant

All Ministry, and research work and construction on the "Integratron", is carried on within the Board of Directors, as no outside help is employed.

BOOK

The book "Religion and Science Merged" may be ordered directly from the Ministry of Universal Wisdom, Inc. The address is on the back page of this issue of the "Proceedings". The donation is \$3.50 postpaid.

Thou Infinite Creator of All. Whence came I from, to arrive here? For what purpose? In what part of Thy endless plan am I now? I look upon the magnitude of Thy creations. I see halos of sunset and flowers, yet I cannot even color one petal of a rose. To what end am I traveling this path? Am I an extension of Thee? I comprehend not what I should do. I study Thy vast expanse and realize that I know not even that portion of Thee which is in myself. Who am I to study stars? Where is there one so low that I cannot look up to him? For all this puzzle comes to my awareness that I don't even know where I am going and yet I would pretend to advise others. To what extent can I command myself to do Thy service? Am I inexhaustable? Give me the word. Give me The Word, that I may do, that I may say, that I may command the result for which thou hast created me, Infinite One.

Mer.

I gather here from eons past those records written in the flame of eternal truth and from the future yet to come. I gather events today, not to place them on the altar to be sacrificed to needless thought, neither to be scattered in the winds that they may bring to birth another time. Only has the future and the past been gathered for today, that you may be aware that yesterday is tomorrow to many, while yet tomorrow is yesterday to some. For time is effaced by eternity, only to be trampled in the dust of material things, and those who gather stars within the image of themselves, have gathered more than intellects throughout recorded time, for thought is not intelligence. It is bounded on all sides by opinions expressed by others; too, it will fail you when you need it most. For thought is but the means to contact that infallible Ever Presence, the vibration true to all and each, nor rank nor social standing shall it favor. For when man thinks within his day, he sleeps within his night and from his present he gathers words, expressions and actions yet to come. Be not betrayed, for thought alone is only a tiny line of light, connecting true receptivity with inner conscious being. Many events from the past can scar this line and lead you off the path. Remember only light can be eternally the source of all that is.

Mer.
