The "Proceedings" is mailed free to those people who request it and financially support its printing by contributions. There is no subscription rate. All donations, checks, money orders, contributions and bequests should be made to the Ministry of Universal Wisdom, Incorporated.

"PROCEEDINGS" are published by the Ministry of Universal Wisdom, Inc., at Yucca Valley, California. Printed in U.S.A. Business and Editorial offices: College Utility Building. George W. Van Tassel, Director; Darlene J. Wing, Secretary-Treasurer; G.W.Van Tassel, Editor. All rights, including translation, reserved. Manuscripts and photographs from our members or friends must be accompanied by a self-addressed, stamped envelope. As we do not employ solicitors nor representatives, please address all correspondence concerning "Proceedings", contributions, donations, bequests, etc., directly to:

Last Issue Of The Nineteenth Year Of Publication

THE UNIVERSAL POWER

We are reprinting drawings, and data, in this issue of the "Proceedings" that we printed in November and December of 1954, and January of 1955. This information may not be of any value to many of our readers, but we feel it is important to some of our readers around the world because of recent verification.

In 1954 and 1955, our space program was still in its planning stages. Nobody had ventured into space.

In December of 1954, we printed data on a field around the earth which we called "the earth's force field". Four years later our first space probes verified this information, and it was named the "Van Allen Radiation Belt".

In the illustrations, in this article, also printed with the information in 1954 and 1955, we printed the principle of "Celestial Mechanics" explaining what makes a solar system work.

Recently N.A.S.A. and the Russian space program, printed data on the measurement of linear lines of energy in space in a rythmic wave motion of 8 cycles per second. These are the lines shown in these reprints which we called "the positive lines of force". These are the vertical lines in all three drawings. When science develops some method of measuring the negative lines of force, shown horizontally in these illustrations, then they will begin to understand the birthplace of atoms and solar systems.

The reprints follow, with only part of the information originally printed in the "Proceedings":

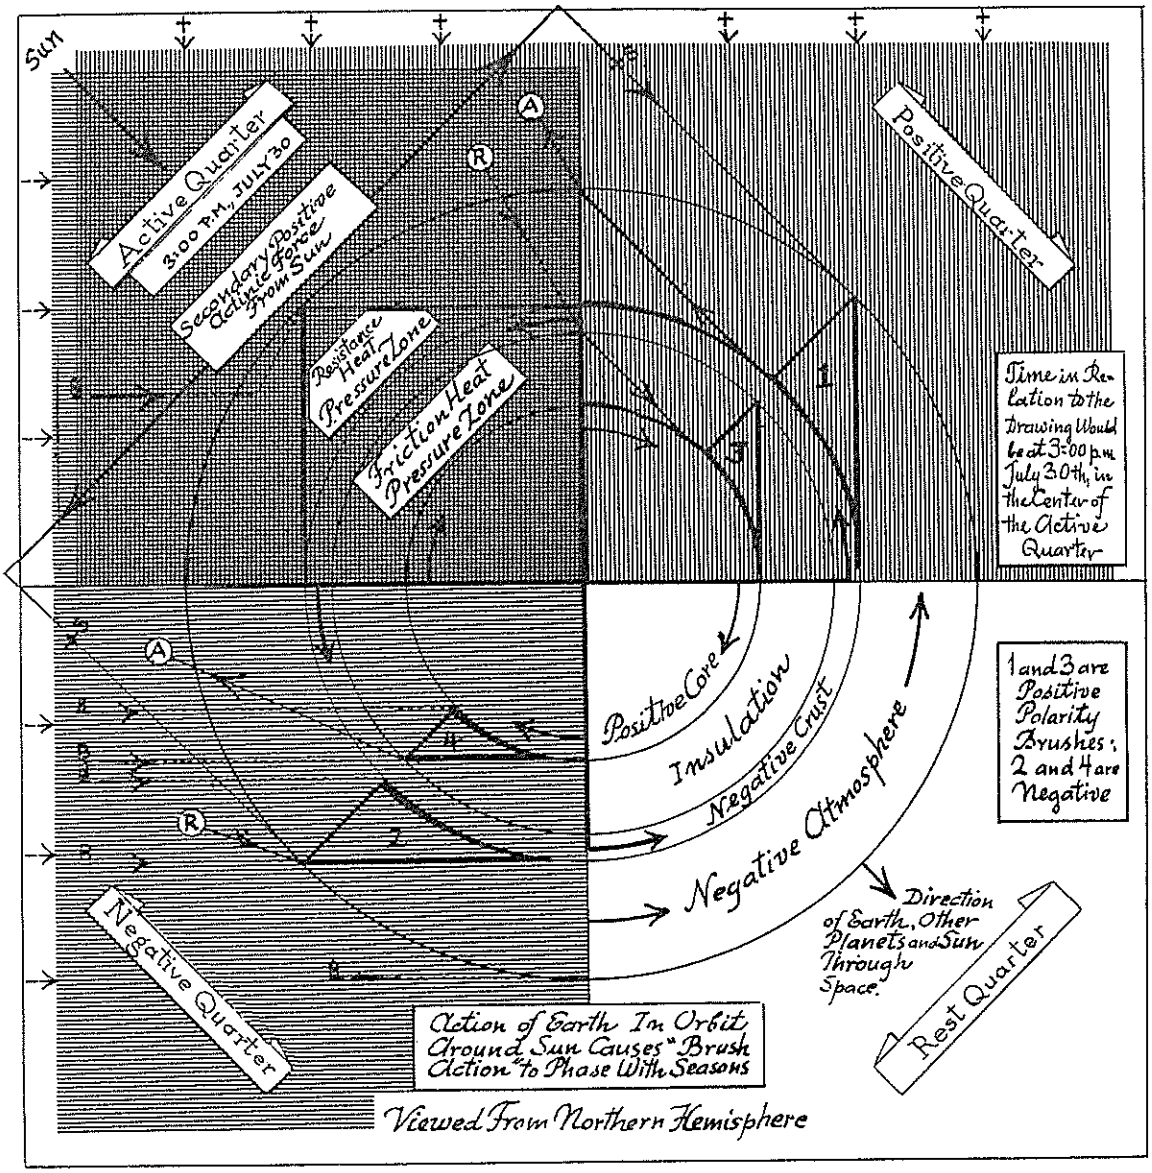
The Earth As A Motor

The positive and negative lines of primary light energy cause all motion. Humans, atoms, suns, planets and galaxies are all powered by the same forces.

The Earth is an oversize electron of a predominantly negative polarity. Its rotation and orbit are the result of attraction and repulsion to the lines of primary light energy.

The drawing is made with the Sun shining in the center of the Active Quarter from a 45 degree angle. The Sun is the alternator that changes polarity predominance from one hemisphere to the other every six months.

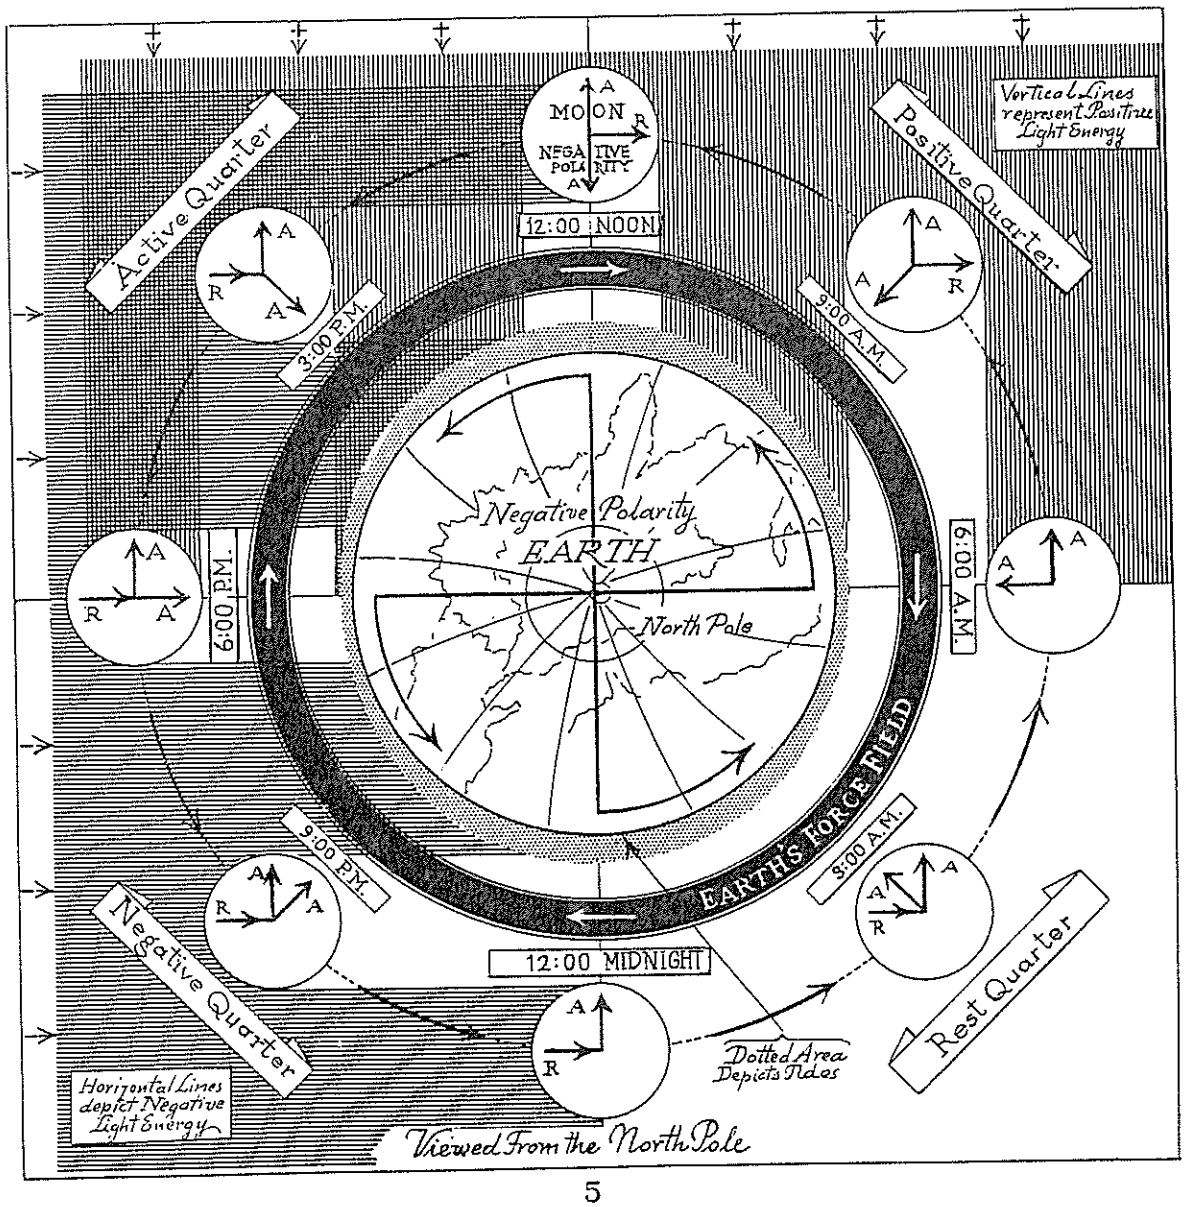
The circles inclosing the "A" and "R" indicate the direction of the attracting and repelling forces. The Negative Primary Light attracts the positive core in the Negative Quarter and repells the negative crust. The opposite is true in the Positive Quarter. These two attracting and repelling "brushes" are changing position continously as the Earth orbits.



The Moon is one of the bodies acting as a governor to the Earth. The Earth's tides are a "fluid drive" connection between the motor-generator-battery Earth, and the governor Moon.

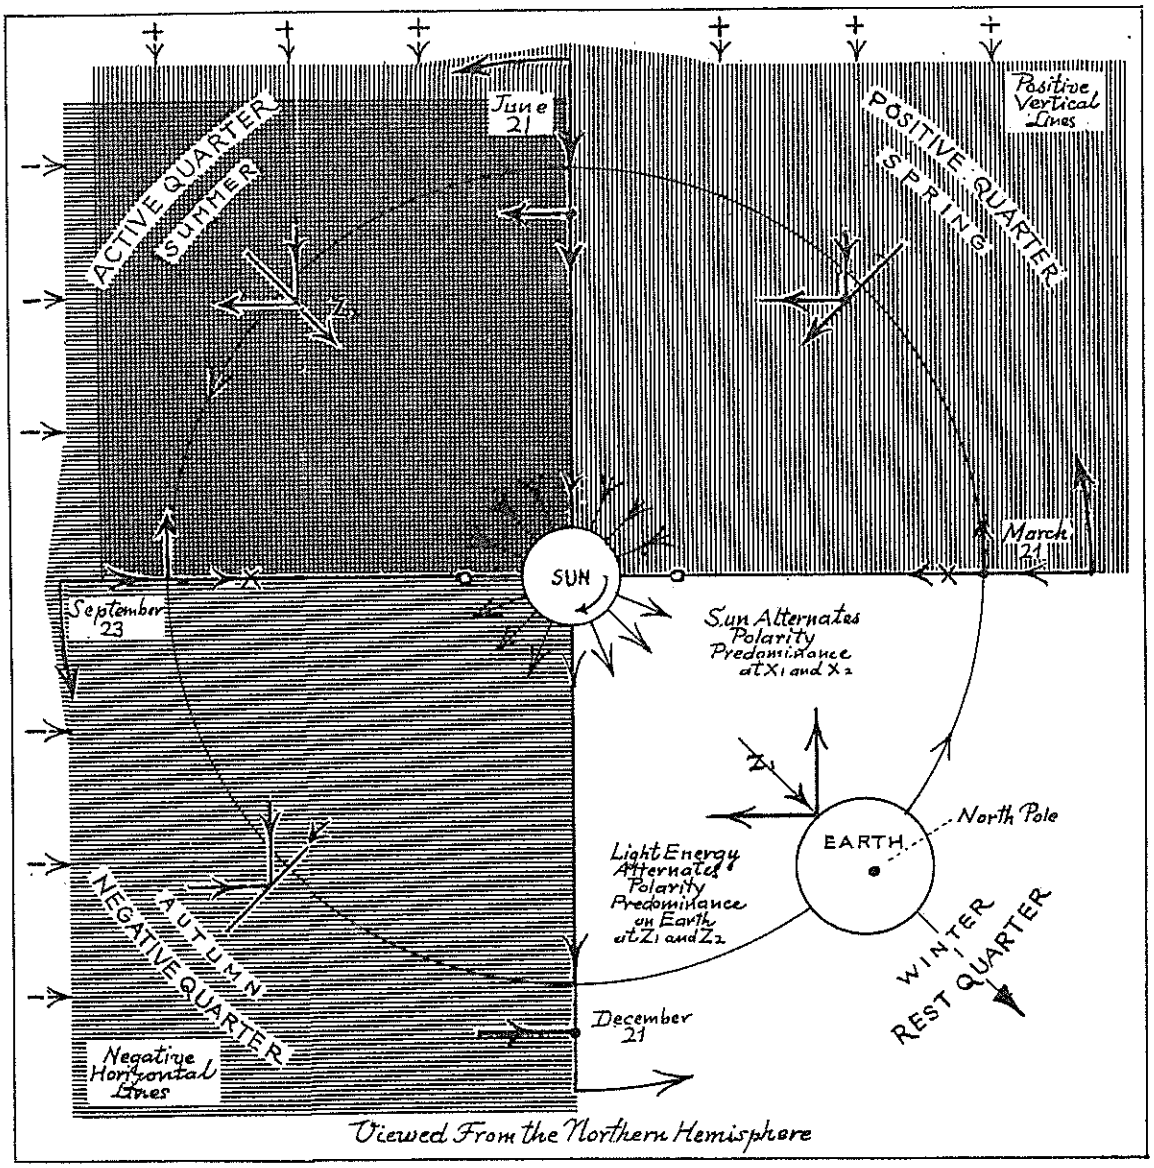
Gravity of the Moon has no effect upon the Earth. The only effect of the Moon upon the Earth is by polarity action on the Earth's force-field and by interruption of the light lines of force.

The Earth is surrounded by a self-generated force-field. Nothing inside of the Earth's force-field is affected by anything outside of it, except through the attracting or repelling effects of polarity in the lines of light energy or the Sun.



From 6 P.M. to Midnight cast the Negative Quarter. Both the positive lines of light-energy and the Sun's attractive forces are eliminated and the negative lines of light-energy maintain only the heat of resistance by repulsion. The forces of the Active Quarter fade away and the negative physical bodies of people become tired and sleepy during the Negative Quarter.

In the Rest Quarter, from Midnight to 6 A.M., the Sun's positive force, the positive lines of light energy, and the negative lines of light energy set up no resistance of attractive or repelling forces. So the atmosphere and crust cool off in the coldest quarter of the cycle, because the surface is shielded from the three forces by the planet.



Our effort, in this article, is to bring to the layman's mind the understanding of light-energy as applied to the orbits of galaxies, planets, or electrons.

Every planet in the universe moves in curved lines of travel. This is not because they were thrown off by a Sun, or central body. If they were, they would not orbit. Anything thrown off of a rotating object will travel in a straight line outward, though it may fall because of gravity on the Earth. The reason planets, or electrons orbit around a central body is — they are powered by light-energy.

Once again, get this straight in your mind - positive or negative light-energy cannot be seen by physical vision. They are both invisible unless they encounter resistance in opposition. They extend infinitely throughout all space and penetrate all bodies in ratio to their densities.

In the drawing of our central Sun and the Earth in its cyclic orbit is the explanation of the only way to square the circle.

Light-energy squares the orbit of every body that travels in it. Light-energy powers everything that manifests motion whether directly, or indirectly.

The Moon and the Earth are both of negative polarity — as are all humans in their physical substance and all bodies that can be seen by reflected light.

All negative bodies generate a positive force-field and all positively charged bodies generate a negative force-field.

The atmosphere is actually a part of the crust and is of the same polarity. It acts as a bearing for the crust to turn in. The atmosphere and oceans are affected by the helical vortice set up in each hemisphere in opposite directions. This is caused by the depleted lines of primary light giving their energy to motion of the planet. As they are depleted they try to reach rest, like people, so they head for the point of least motion; which is at the poles. Naturally the polarity seeks opposite polarity.

The small arrows, shown on the Moon, indicate the direction of forces set up by polarity affecting the Moon. The A arrows represent attraction forces and the R arrows stand for repelling forces. At all times these forces are changing their predominance until the zero point of curvature is reached, which establishes the Moon's orbit around the Earth. The Moon's orbit speed is fixed according to its charge of negative polarity.

Everything on the Earth is affected by the Moon's interruption of the positive and negative lines of light energy. Though this effect is variable it is apparent in tides, crops and people. At points where the Moon interrupts the positive — or negative — lines of light energy, natural magnetic vortices — on the Earth — may cease their rotation for an interval of time, or rotate in the opposite direction.

The secondary light rays from the positive Sun and the positive lines of light energy warm the morning cycle from 6 A.M. to 12 Noon. This occurs by the attractive, resistance heat effect in our negative atmosphere and the crust of the Earth. The force-field does not decrease these polarity effects because their polarities are both positive, therefore they offer no resistance to each other.

The heat registered during the hottest part of the day is in the Active Quarter from 12 Noon to 6 P.M. Higher temperatures are registered in this quarter because the Sun and positive lines of light-energy are setting up attraction resistance within our atmosphere and the negative lines of light-energy are setting up repelling resistance. Two forces are working in attraction to the force of the Earth's polarity and one force is working in opposition to it. The negative lines of force also meet resistance of the positive force-field, which acts as a parabolic reflector.

The polarity predominance alternates between the northern and southern hemispheres of the Earth and causes the force-field to oscillate. The erratic orbit path of the Moon follows the oscillations of the Earth's force-field. The Earth's positive force-field rotates opposite to the Earth and the Moon's orbit. Interruptions of the light lines of force by other bodies or planets causes variable effects on the Earth and its reactions are transmitted to its self-generated force-field. These influences cause the oscillations to vary and hence the Moon's orbit is variable.

KOHOUTEK AND THE STAR OF BETHLEHEM

Kohoutek, is the name of an astronomer who works in the Hamburg Observatory, in Germany. Lubos Kohoutek. He is the first astronomer to report a large comet approaching the Earth. In astronomy, usually the astronomer who first discovers something new in the heavens, has the discovery carry his name, hence, Kohoutek's "Comet".

The "comet" is due to arrive at Christmas time this year, and will be the largest, brightest, object seen by the human race. It will be visible to the naked eye for nearly three months.

Looking into Biblical prophecy, Matthew 24:27 says; "For as the lightning cometh out of the east, and shineth even unto the west: so shall also the coming of the 'Son of man' be". Kohoutek's Comet will be seen in the East and end up shining in the West.

Jesus describes todays messed up world in Matthew 25, the whole chapter. Then in Matthew 24:30 he describes a <u>sign</u> to be seen in the heavens in the end times.

The "Star of Bethlehem" was called "his star" by the three wise men in Matthew 2:2.

Now lets see what happens if we try to connect Kohoutek's name with any past history.

Canceling out the K's and O's, in Kohoutek, we come up with the letters that are left, HUTE. Breaking this down further, we have <u>HU</u> - <u>TE</u>. HU is the name given to the Sphinx which is the symbol of the cross-breeding between Man, in space, and the animals, on Earth, as described in Genesis in the Bible. This brought about the HU-MAN species on the Earth. The Sphinx has a female animal body with a mans head on it.

<u>TE</u> is a symbol in the atomic table of elements and is number <u>52</u>, tellurium; <u>52°</u> is the angle, from the base, of the sides of the Great Pyramid. The Great Pyramid is described in the Bible as "the stone witness". The Great Pyramid and the Sphinx stand side by side in the Egyptian desert. The "tellu" in

tellurium also fits the Latin "Goddess of the Earth", "Tellus" in Roman mythology. "T" also was the symbol of the original cross, with the top horizontal line indicating the "laying down animal", connected with the vertical line of "standing upright man". The Christian religion always connects Christ with the cross and 52 times in the Bible he is called the "Son of Man".

Why didn't a Jones, or Smith, discover the Comet? Is this part of the prophecy of the destiny of Earth? One doesn't have to look far these days to see that this civilization is falling.

Kohoutek's Comet will scare the hell out of about 50% of the Earth's population.

Could this portend the return of Christ? God knows we need someone from out there to straighten out this mad Earth.

Is Kohoutek's Comet the "Star of Bethlehem" returning?

In the Acts of the Apostles, in the Bible, Chapter 1:9,10 and 11: it says, "And when he (Jesus) had spoken these things, while they beheld, he was taken up; and a cloud received him out of their sight. And while they looked sted-fastly toward heaven as he went up, behold, two men stood by them in white apparel; Which also said, Ye men of Galilee, why stand ye gazing up into heaven? this same Jesus which is taken up from you into heaven, <u>shall so come in like manner</u> as ye have seen him go into heaven".

Now we have world-wide television so "every eye can see him". We have space ships from space, seen and photographed around the world, "the armies of heaven". And we have Kohoutek's Comet approaching at Christmas time.

The latest information, which we obtained about Kohoutek's Comet before we went to press, with this issue, is as follows.

The "Comet" will have a brightness of - 987 magnitude as seen from the Earth at it's brightest point. It will start being visible to the naked eye on the 10th of November. It will be at maximum brightness on

December 28th; this period in the morning sky before it gets light. Then from January 2, 1974 it will appear after sunset in the western sky and pass out of vision to the naked eye the first part of February 1974. The Earth at this period will be 92,900,000 miles from the Sun. The Comet will come 10 times closer to the Sun than the Earth is, passing about 9,006,000 miles from it at the closest point. We thank astronomer, William Miller for this information.

Now to add one piece of information from our source "upstairs"; the Comet will do something "different" after passing by the Sun that no other "Comet" was ever seen to do.

On top of this Christmas spectacular, there is an annular solar eclipse on December 24th. This will be visible in the Eastern United States.

Watch during this period and follow up the after-effects; possibly a revolution by our elderly citizens against high living costs. There is a bad astrological influence, also, against a top government official at this point in time.

THE "INTEGRATRON"

Thank God for you few faithful readers who have made it possible to keep the work on the "Integratron" progressing.

We have painted the "Dome" at a cost of about $600.00. We bought a small 12'x 18' steel building, in order to move a lot of equipment out of the "Dome" and store it. Cost about $800.00.

It looks like we will have the 55' diameter armature rotating soon. A mechanical wonder. When this is accomplished, we will start winding the giant coils and install the instruments in the control room, as we can afford it.

This project, being the first of it's kind, has been a long hard job. Twenty years in the making, but you have been a tremendous team in this accomplishment. Stay with us and we will complete it together.

"BLOW YOUR MIND"

Some readers of the "Proceedings" have frequently written and said, "a lot of the material in the 'Proceedings' is over their heads".

Many things are "over the heads" of all of us in these "latter days". Massive waste, ecological disaster, overkill capacity, loss of patriotism, welfareism, riots, bombings, lies, corruption, economic inflation, and high taxation. All of these piled on top of computers, automation, Anti-Ballistic Missiles, nerve gases, and Vietnam, make one wonder what is going on. Is this planned? Is this a lack of intelligence in high places? Is this the influence of greed, power, and turning away from God given principles? Where does it all end?

There is a civilization functioning in us, all around us, and it reciprocates, communicates and works unnoticed by anyone, in a harmony that is fantastic. I am speaking of the living cells in you, in fish, birds, animals, and plant life. They are not educated in schools, they have no economy, no politics, no military, no churches, no propaganda, no government except the laws and order of nature as God made it.

It has been demonstrated by Hieronomus, Baxter, and many others that this cell civilization communicates by thought, responds to thought, has no limits over distance, and conforms to the order of living forms and the laws of God. Can we call this cell civilization a lower order of life than man? Can we continue to poison it, analyse it, drug it, kill it and ignore it, expecting no response, or reaction? Do the materialistic laws of legislation improve the order of God's nature?

Who among the mighty is without weakness in judgement, decision, and order? Where do the insignificant decisions of the wealthy, the officials, and the church, change this cell civilization or the order of the universe?

Life is a manifestation of God in all living things. The pattern of a butterfly's wings is as it is because

the infinite essence of the mind of God is there, making the pattern as the ever present mind of God wants it to be.

This Ever Present Intelligence of the essence of the mind of God is the media with no limits, no speed of light, boundless, and perfect in it's order. Cells use it to communicate, to activate, to gather in forms of hearts, organs, and bodies with forms.

This is the instant cure, the miracle worker, the maker of clouds, water, and galaxies. This is the law and order of atomic structure where it is. When one can accept the fact, that they are a body form composed of trillions of entities we call cells, each performing its function in order and harmony, as an act of God, with no conflict, no propaganda, no politics, no money, no legislation, and no military might, they can begin to be intelligent.

The more one meditates on this and excludes the thousands of man made laws, the more one begins to be a cosmic creature. Blow your mind like you blow your nose and get rid of the conflict, misunderstanding, and limits of the physical materialistic world. Be one of God's creatures manifesting the combination of the cell civilization you are composed of. Realize you are subject to the laws and order of creation. You are responsible to this portion of the essence of God that makes you go.

The communication, by thought, with these cell structures is what makes faith healing and prayer healing work.

Resonance between the cells works like the notes in music. If you strike a key on the piano, say a "C" key, every "C" string in all of the octaves on the piano vibrate if the piano is in tune. By the same token if your brain cells transmit on a given note every brain in the same vibration of cell structure will receive your thought. You may have this thought without knowing why you had it on the receiving end. These thoughts of other people may be cause of your starting out to do something, and end up doing something else, or not following your original intention and end up not doing it at all.

Cells of all hearts are in the same octave, but each has it's individual vibration. The same applies to all livers, brains, kidneys, and other organs and glands.

Cell resonance can make you sick if you are on the same resonance as some one who is sick in your acquaintance. On the other hand, the media of communication which is the essence of Universal Mind, or God, can allow the cell communication, or prevent it.

Divine direction in your life depends on whether you have earned it. If something breaks right for you, seeming to happen so perfectly, without any planning on your part, you are being rewarded by God's law of reciprocation for something you did under universal law. The greatest response under this law is not so much what you do but the intent of why you did it.

Moses received divine direction after he killed a man. This reciprocation was not because he killed with intent against the man, but rather his intent was to save a friend.

All intent for personal gain results in misery because this is the rebound of selfishness. All giving, with intent to benefit others, will result in a feeling of satisfaction that is a personal ecstacy, which no one else can feel but the giver.

God's banking laws are very much like Earth banking laws. If you haven't made deposits of "Do unto others" and accumulate a deposit, God can't violate His own fixed laws and respond to your prayers if you haven't anything in His bank to draw on.

You must give before you get, the same as you must put gasoline in your car before it will run for you.

Universal Mind, that static resting media of pure intelligence, is in every atom, cell, and individual. God didn't give man "dominion over all things" to corrupt it, to exploit it, or destroy it. He expected man to carry on the creation by uplifting it and loving it.

Every function, of every one of the hundred trillion cells in one adult human body, is done by each cell

with divine intelligence to perform its mission in life. No motors, no computers, no form of administration making laws controls its intent, or purpose.

The population of the Earth is a small fraction of the cells in one human body. Why does this small minority of humans have to keep this vast majority of cells in constant discord by their ungodly intent and greedy actions? Why is everything going from bad to worse on the planet? Jesus didn't need a security guard, or an armored car to travel among the people.

Lets get down to the fact that we are the crew on this ball of rock in space. Mutiny must cease. Money must become the servant not the master. God never gave man the right to dominate others of the race of man. His law said "all other things".

The greed for authority in the world today is leading to the downfall of all authority. Laws of man are made to be violated so officialdom can collect fines to perpetuate the disorder. God made the laws of order. When are people going to break the satanic influence to get more instead of give more "unto others".

The media of mind in the cell, or people, can only reciprocate in health, or hell, according to the intent of the thought on the part of those who were given dominion.

Let the world's conflict and confusion of material disorder be "over your head" and understand the God within you.

PERMANENT RECOGNITION

Any individual who contributes a gift to "The College of Universal Wisdom" of $100.00, or more, will have their name stamped on an individual brass plate which will be visible around the base curb of the "Integratron". Their name will also be listed behind glass on the front of the office building. Each additional $100.00 gift, by anyone whose name is already listed, will be marked by an asterisk behind their name in the cabinet on the front of the office.
