for Religious and Scientific Research.

VOLUME 9 JULY - AUGUST - SEPTEMBER 1970 NUMBER 3

S MAN, in the ever changing pattern of my thoughts I bring my creatures into being. — In seeing motion all about, never doubt that I am there. For I am motion, change, and time, so that my rhyme of repetition may cycle all my parts.

Your eyes reach out to see the stars, not realizing each has stars within. Though sin may barricade your way to me — change will be your sword to rend the veil and I shall hail you in your victory over self.

Though my time is naught to me — time to you is meant to be a gauge — to register progression in my ways.

Motion is the me in thee, O man, to manifest a change — so that in time you may escape the rhyme of rebirth repetitions — and be timelessly the peaceful thought of me — eternally.

A MESSAGE FROM "THE GOLDEN DENSITY."

HELP GOD MAKE YOU WELL

The story of creation tells how God created all things in six periods of time, and then rested. In no record of the creation is there any reference to God coming out of the rest, and creating anything again.

Since mind is the source of all things, we know God is an infinite essence of perfect intelligence at rest, or everywhere through space and time in a static state.

Knowing that you are encompassed in this mind of God, that this pure essence of life permeates every atom of your being, and that you are physically manifesting God here, will give you the ability to use God.

God loves to be needed, loves recognition, loves to respond to those who are involved in conditions that require help.

God being at rest, neutral, in a static state, needs to be activated in order to respond to mans many requirements. God responds in many ways in times of crisis, like giving a man the super-human strength to lift a wrecked car off of another person.

Since God ended the creation, and gave man "dominion over all things", and the right of free choice, you are in a position to command and select to improve, or maintain, your dominion. God doesn't like beggers who come crying for help, only turning to God when they hurt, as if God was a first-aid kit.

When your health is impaired, or injury afflicts you, most people in their suffering try to reach God for help by praying to someone "up there".

Expand your concept of God being here, and up there, and everywhere, throughout the infinite universe. Then grasp the fact that you are a creation of God, and when you hurt, God hurts where you are.

Every gene, chromosome, molecule, and cell, in your body performs it's electro-biochemical function here in order, coordination, cooperation, and effect, without voluntary thought on your part.

Every cell in your body, 100,000,000,000,000 of them in one human body, knows their function and purpose, because God is where they are. In essence God's mind knows all things, so the cells know what they were created to do, and use that portion of mind they occupy. To us, the cells work involuntarily on our part, but to God they are following the instructions of their purpose in creation.

Every one of your body cells are individuals, like people are individuals. Didn't God give you dominion over all things? Those cells are you. They feel every thought you have. They enjoy your happiness. They suffer when you hurt.

Those poor combinations of cells that compose your physical body, were not given dominion over anything. They can only perform within the limits of the functions God created them for. Each one, in different octaves of resonance, works with others in the same octave to be a heart, a kidney, artery structure, and all parts of the body. In this symphony of octaves, they perform in being the organ, or gland, their vibration is in God.

They get tired, they fail under demands in excess of their limits, and their only rest is in absorbing that rest of God's mind they are in. They each want to live as much as people do.

Cells being in the infinity of mind, like to be praised, and loved, and respected the same as people do. You are on this world, the earth. Their world is in you. Each cell is composed of galaxies of atoms, and solar systems of molecules, like the universe on a micro scale. You are a universe of universes in an infinite universe of planets, solar systems, and galaxies. You are a cell in God, on a planet.

God made you as an eternal electro-magnetic entity to assimilate these combinations of cells here, because the environment on the earth requires a physical body for you to manifest here. Each person is a center of activity in the static mind of God where you are.

God is the still resting fulcrum, the balance point in mind between the two choices he gave to man. Everything throughout the universe moves in order, by fixed laws, in the essence of the perfect mind of God.

In your body of cells, like people, they like a thought of thanks, a "pat on the back" so to speak, for their endless effort to keep your physical body going. How many people ever express their appreciation to this vast civilization of cells they are composed of?

Cells can only assimilate that atomic structure which is within their frequency limits. Anything in excess, or foreign to their frequency is injurious. In this respect they are like a human stomach. That portion of infinite mind cells occupy, established their resonance and that is all they can be.

Brains are a bipolar gland of receptive and projective abilities in the volume of mind they occupy. Brains are an octave of cells that can only be brains.

When a person thinks, they only activate the brain to receive that thought, out of the infinite mind of God that knows everything. The brain can only remember those things a person programs into it through education and experience. In meditation one tries to clear the stored information and bring the brain into the neutrality of its bipolar ability of free choice.

The better one can meditate to the balance point, or a state of blank mind, the nearer one gets to God and assimilates from this perfect mind. One is only capable of extracting from this perfect mind of God, those things which the brain limits of concept can receive. Periodic, frequent practice enhances these concept boundaries. Meditation is the purest state of rest that your brain cells can get.

The most intellectual materialist can be a spiritual idiot. Spiritual dominion over all things requires desire and effort. God doesn't let you use God's infinite mind beyond the rights God gave you; neither will God permit mind to be used to uncreate the original creations, without God's fixed laws bringing about reciprocation to the act.

If you are sick, or hurt, in some part of your body, focus your thoughts on that area. Then think to the cell structure, thank those cells, compliment them, apologize to them for not realizing they were intelligent. Get them to be friendly, like you get people to be friends. Then communicate your request that they get in harmony and resonance and correct what is wrong in their area. Think to them periodically. Recognize their community level of life which makes up you. Tell them they are in discord with that portion of perfect mind they occupy. Tell them to get on the ball, because if you die, they all die too. Give them credit for the intelligence of being what they are. Brag them up. They will respond if you have stopped the excess, or condition that made them sick.

Broken bones have been grown back together in minutes by people who understand their dominion over the society of self. This also can be used for others by picturing in mind what they look like and where they are.

When God gave man the right of free choice, God expected man to use it. When God rested, God expected man to awaken God when need required it.

Get on the ball! Love yourself! Laugh! Do all things in moderation. Be happy. The civilization of cells which compose you will respond if you treat them like they are somebody, which you are. God is bored with rest. Use God.

SPACE CONVENTION

The 17th Annual Space Convention is to be held at Giant Rock Airport, on October 10 and 11th. This is a personal activity of George W. Van Tassel, who operates the airport.

The Ministry of Universal Wisdom, Inc., is not associated with this activity in any responsible capacity, although we will have a booth at the convention.

HERE AND IN RUSSIA

It is amazing how the people in various parts of the world react differently to the same things.

There is a new book out entitled, "Psychic Discoveries Behind the Iron Curtain", by Sheila Ostrander and Lynn Schroeder. It is published by Prentice-Hall, Inc., of Englewood Cliffs, New Jersey. The price is \$8.95.

This book is well done and reveals many things to the reading public that were not in print before.

It is too bad that Sheila and Lynn didn't write the same type of book about the United States first, because some of the experiments they attribute to the Russians as their discoveries, were done by us 30 to 40 years ago.

There is a whole chapter on "Pyramid Power and The Riddle of the Razor Blades". (Page 336). Patent number 91304 was issued in 1959 to Mr. Karel Drbal, in Czechoslovakia, on a small pyramid to keep razor blades sharp. In the United States, Vern Cameron of Elsinore, California, was doing this, and printed bulletins on it, in 1940. We correlated some of our research here with Vern in the early 1950's and found additional uses that the pyramid could perform. Recently your Editor was ridiculed in the Los Angeles Times newspaper, for printing data in the "Proceedings" on how to use the pyramid principle for removing smog in the Los Angeles basin. What the "Times" didn't know, or find out, was that we had already demonstrated that all atomic structure; razor blades, insects, worms, meat, hydrocarbons, smog, gases, solids and fluids, are affected by the pyramid energy generator. In the "Proceedings" of February 1st, 1954, I printed data on the pyramid as an energy generator. So let Los Angeles keep their smog.

Sheila and Lynn printed data, starting on page 158, on research conducted by Nikola Kozyrev on "time stretch". Kozyrev believes that "time is a form of energy". We have used time functions in our research

and agree with Kozyrev, that time can be stretched and compressed, not as an energy, but as the changing of a period of natural actions. We discovered, as a side effect of one test, that time in the atomic decay period could be compressed instantly. Theory-wise we believe we can eliminate the time period between the atomic decay of gold and lead and convert lead into gold instantly. We have already done this with another material.

Sheila and Lynn write also about "eyeless sight" in Russia. Margaret Foos demonstrated this for years over here at the Conventions at Giant Rock, and on television in the 1950's.

In the chapter on U.F.O.'s and P.S.I. on page 93, the authors write about Russian data that we had in print in the "Proceedings" in 1954, 55, and 56.

On page 372, Lynn and Sheila tell of Dr. Julius Krmessky's research on an energy that "goes right through glass, water, wood, cardboard, any type of metal, even iron, and it's strength doesn't diminish at all. Furthermore, the Mind seems to control this energy." How many years have we been printing articles on this in the "Proceedings"? Since 1954.

The Russians, call the Spirit the Bioplasmic Body. This is so their science will not get into religion and become contaminated.

This book, by Sheila Ostrander and Lynn Schroeder, reveals more real information on experiments, facts, life, and forces we label E.S.P. and other names, than any other single book. A copy should be in every thinking persons home.

While these researches go on in Russia, financed and aided by authority, over here we are still ridiculed and persecuted.

When the "Integratron" is finished we will reveal phenomena beyond the imagination, besides regeneration and it's basic purposes.

Some of our scientific authorities should visit the Library of Congress in Washington, D.C., and study all of the back issues of our "Proceedings".

NEWS CLIPS

From Denmark:

Policeman Photographs "Flying Saucer". By Jens Thomsen -
(London Express Staff Reporter).

Copenhagen, Aug. 16 -- Policeman Ewald Hansen Maarup from Haderslev in Southern Jutland has photographed a Flying Saucer during a routine highway patrol.

Hansen, 38, said that the engine of his car stopped and the police radio went dead when his car was hit by a strong light from above.

Before he left the car to inspect the light source, he pressed the button controlling the automatic cameras mounted inside the automobile.

The temperature in the car rose, Hansen remembered.

Outside, he saw a dark object in the sky, and suddenly he sensed that the light rays were being sucked into the object and it disappeared.

Immediately after, the car engine fired once more and the radio began to function.

Hansen called headquarters and reported the phenomenon.

When developed, the film showed a small white dot and part of the crash barrier at the roadside was illuminated by a sharp light from above.

The film was given to the Danish Air Force, which will undertake an investigation into the matter.

The Danish UFO expert, Maj. H. Pedersen of the Danish Air Force, said that the spaceship was of the Adamski type often seen in Denmark.

From the Moon:

Astronaut Richard Gordon revealed that plants grow three to four times faster in "moon dust" than they do with normal earth soil. Rocks from the Moon caused three types of earth bacteria to die also.

From Space:

Space instrumentation from balloons and rockets reveals that radiation from far beyond the solar system impinges on the outer level of the earth's atmosphere above the hundred mile level. This causes a glow in the infra-red spectrum.

Theory indicates it may come from our own Milkyway galaxy, or other galaxies.

This is the linear energy that exists in all space that we printed data on in the "Proceedings" in 1954. Wait until the experts find out it is responsible for all orbital and revolution motions, and powers solar systems and galaxies, as we printed it 16 years ago.

From Earth Cities:

We asked in the "Proceedings" several years ago, if the experts had studied results of the addition of enzymes to detergent cleaners? Apparently they had not, or didn't care, because now it is being discovered that these enzymes are causing scum and sludge that interferes with sewage treatment plants.

The House Government Operations Committee has recommended that these enzyme detergents be removed from the market. The high phosphate content contributes to ageing in bodies of water, and skin poisoning for people.

The cities affected by enzyme sewage problems are: San Diego; Ann Arbor; Tucson; Phoenix; Miami; Milwaukee; Green Ridge; Greenwich, Conn; and Manassas, Va.

THE INTEGRATRON

We are sorry to have to report to our readers that all work at the Integratron has ceased due to lack of funds.

We thank those few of you who have supported the work to date. Maybe your inspiration has the answer to this delay.

PROCEEDINGS

We are sorry it was necessary to eliminate the April-May-June issue of the "Proceedings".

Work on compiling the past 17 years of the "Proceedings" into a book, and other necessary work, required the time.

We want to thank those of you who have supported the printing and mailing costs. Before the next issue, we will have to remove names of people from our mailing list, who have not supported the "Proceedings".

RECIPROCCATION OF FIVE 20 YEAR CYCLES?

Both Presidents, Lincoln and Kennedy, were concerned about civil rights. Lincoln was elected in 1860; Kennedy in 1960. Both were slain in the presence of their wives, and on a Friday. Both were shot from behind, and in the head.

Their successors, both named Johnson, were southern Democrats, and both were in the Senate. Andrew Johnson was born in 1808 and Lyndon Johnson was born in 1908. John W. Booth was born in 1839. Lee H. Oswald was born in 1939. Booth and Oswald were southerners favoring unpopular ideas. Booth and Oswald were both slain before going to trial.

Both Presidents wives lost children through death while in the White House. Lincoln's secretary, Kennedy in name, advised him not to go to the theatre. Kennedy's secretary, Lincoln in name, advised him not to go to Dallas. John W. Booth shot Lincoln in a theatre, and ran to a warehouse. Oswald shot Kennedy from a warehouse, and ran to a theatre.

The names, Lincoln and Kennedy, each contain 7 letters. The names Andrew Johnson and Lyndon Johnson each contain 13 letters. The names John Wilkes Booth and Lee Harvey Oswald each contain 15 letters.

" Every President elected in a year ending in zero, has died in office. "

THAT INFINITE MEDIUM

Now that science is verifying God all over the place, it begins to look like we could have a heaven on earth. Of course as long as people accept God in the image of humans, their limited concept will keep God up there, and us down here.

Limited brains in scientific areas will also reject these unlimited findings because they don't want anyone to rock their status-quo boat. Baxter's research in plant-animal communication is not only upsetting the orthodox science boat, but it is draining the oceans off that the boat floated on.

This research alone has verified principles we have been trying to express in the "Proceedings" for 17 years. This research has already proven there is an infinite static mind. It has exploded the theory of evolution. It has established a medium that is instant regardless of distance in thought communication, and it has resolved that this static medium is neutral.

Efforts by others to tie it to atomic radiation failed, when they found it works through lead shielding as if the lead weren't there. Tests to prove it was electrical failed when it worked as well in a Faraday Cage as it did outside of it. Galen Hieronymus proved it worked to the moon and behind it with the Apollo flights.

Every atom functions by it. Genes, enzymes, chromosomes, cells, and assemblies of these, function by it, and use it. Crystals of the mineral world follow it's direction and form differently as elements, and the same in all given categories of the elements. Vines follow it's laws in helicle growth. Vegetation follows the laws of it's purpose for them. Insects, birds and fish use it's directions to navigate by. Galaxies, solar systems, and planets, follow it's laws in perfect order.

The only thing that apparently doesn't follow it's perfect laws, are humans. They want to follow their own systems in opposition to it, or in disregard of it.

Look at the mess the human systems have gotten themselves into. Computers are only as good as the people who program them.

Legislation fails, economy fails, wars are never won as there is a loss on both sides. Governments collapse. Everything humans make wears out. Prayers aren't answered. The word peace, is a hypocritical expression.

How did the planet get into the condition it is in? The people violate all of the laws of nature. They refuse to follow the Golden Rule. They are on an accelerating road to oblivion because they can't grasp the fact that God's laws are absolute. They foolishly say, "God is dead". This is admission that there was a God to die.

No, God isn't dead. God is in every atom, molecule, and cell of your body, intelligently coordinating these billions of billions of individual functions, or you couldn't manifest life as a person here.

Something with absolute intelligence has to make all of these things work. Birds are perfect navigators. Bees are the best of engineers. All of them are perfect meteorologists.

The only bull-headed, backward, living entities on this planet, are humans. Nothing in the plant, fish, insect, or animal world, has anything so stupid as an economic system. They never hold elections. They have no race, color, or creed conflicts. They only do what God made them to do.

Humans in rebellion against God's perfect systems in all other things, think they are going to do it better than God does it.

Astronauts in orbit? We are all in orbit around the Sun on this planet. There isn't anything humans can do that God hasn't been doing for billions of years.

This isn't the first civilization that made military weapons to enforce the peace. The remnants of the others are all over the earth. How high can one go in this earthly society? High enough to be President and get shot? High enough in education to get drafted and be killed? High enough to be looked up to by underling

illiterates? High enough in wealth to retire and stop serving?

What is the goal of humans? Every living thing on the planet conforms to it's God given purpose except humans. Why? The answer lies in the fact that for generations the system has been contrary to the laws of God.

Greed on the part of those who have. Desire for power on the part of those who are not qualified for power. Rule by force instead of love. Correction by confinement, or fines, instead of correction of the conditions. Everything designed to whip people into line instead of coaxing them into order. Everything connected with God is free, and everything concerned with people, costs.

Bureaucracy is killing itself. The turnips have no more blood. This infinite essence called God, saw the possibility of this in the beginning, and created laws of reciprocation to maintain balance. Humans have pushed their pendulum too high, too long, and now they are running out of push.

The immediate future holds nothing but the downswing of the pendulum, and it is coming down fast. Are you in it's reciprocal path, or is God in you?

HONOR

Your director, George W. Van Tassel, was honored by nomination and approval, to be listed as one of the outstanding people in the West.

The book "Personalities of the West and Midwest", which comes out annually, cites his background on page 284.

This book is published to honor and recognize noteworthy citizens, who have distinguished themselves by past achievements and outstanding service to community and state.

The book may be obtained by writing to:
News Publishing Co., Inc., P.O. Box 226, Raleigh, N.C.,
27602.

ELECTRIC HEAT DISSIPATION

A recent article in "Design News", of October 27th, 1969, is of interest because it opens a new field in electrostatics. This article, written by Lars G. Soderholm, midwest editor, is outstanding because Inter-Probe, Inc., of North Chicago, Ill., who conducted the tests, were as puzzled as we were when we ran into a similar condition in 1958.

Our associate, also in Chicago, was nearly blinded by an unforeseen side-effect. Tests in electrostatics produce unexpected results, because as the "Design News" article says, "electrostatics generally is not well understood because of its existence in the shadow of the more common electromagnetic systems."

Inter-Probe, Inc., demonstrated that a negative charged electrostatic spray on ordinary kleenex tissue would prevent it from burning, or even show scorching, with a 3000° butane torch aimed at it. The positive wire was connected to the torch. "The developer says that present knowledge cannot adequately explain this heat-transfer phenomenon, although several theories appear to offer at least a partial explanation." They also cooled a heated steel tube and a heater coil by the same application.

Our theory on this is that the electron flow serves as a radiator and carries off the heat faster than it can be generated.

This being a side effect, it was not followed up by us in our research.

BOOK

The book "Religion and Science Merged" may be ordered directly from the Ministry of Universal Wisdom, Inc. The address is on the back page of this issue of the "Proceedings". The donation \$3.50 postpaid.
