The PROCEEDINGS OF THE COLLEGE OF UNIVERSAL WISDOM are financed by contributions from its readers. The PROCEEDINGS is mailed free, monthly, to those who request it, and support it.

Being most urgent that the Research Laboratory Building (page 16) be completed and the Experimental Unit put in operation at the earliest date possible, the Trustees of the College of Universal Wisdom at Yucca Valley, California, earnestly solicit its patrons and friends to contribute generously to the Building Fund, and to offer suggestions as to contacts that might be made with possible donors.

PROCEEDINGS are published monthly by the College of Universal Wisdom at Yucca Valley, California. Printed in U.S.A. Business and Editorial offices: Van Tassel Ranch, Yucca Valley, California. George W. Van Tassel, Director; Darlene Jean Wing, Secretary-Treasurer; G.W. Van Tassel, Editor. Copyright, 1957, by George Van Tassel. All rights, including translation, reserved. Manuscripts and photographs from our members or friends, must be accompanied by a self-addressed stamped envelope. As we do not employ solicitors nor representatives, please address all correspondence concerning Proceedings, contributions, donations, bequests, etc., directly to the

COLLEGE OF UNIVERSAL WISDOM
P.O. Box 419, Yucca Valley, California

FRONT PAGE PICTURE

The front page picture and the enlargement on page 3 were taken by Carl Firmin on January 1st, 1953.

Carl was snapping a picture of the Burbank, California float in the Rose Parade at Pasadena, California, when out of the corner of his eye, he caught sight of a brilliant light flashing. Carl says he didn't know what it was at the time.

The object appears to be one of the remotely controlled recorder discs and is apparently photographing our annual Rose Parade.

The dark area around the object is actually the emulsion on the film being nullified, as it would be if you were to take an unfiltered picture of the sun. This is the force field of the object which nullifies our gravity, relative to the ship, and permits control through the time field by thought force.

Other pictures have been taken at many other places that appear similar to Carl's picture.

The original picture we have shows a dark ray expanding from the object to include the float.

ANOTHER JAUNT

By the time you receive this issue of the "Proceedings", Dan Fry, Art Aho and yours truly, should be on a quick flying trip to New York and back.

It is our plan to leave Giant Rock Airport in Art's Tri-Pacer airplane around June 14th, and be back here around June the 22nd.

Several new things are expected to develop from this trip that we will inform our readers of in the near future.

VISIONS ?

Is the Sixth Fleet of the United States Navy likely to be bottled up in the Mediterranean Sea? By earthquake? By bombing?

What happens when a submarine makes a hit with an atomic warhead on a battleship loaded with atomic bombs? Is the entire fleet lost, or only the battleship and the submarine?

Will the minds of a bomber crew cause them to deliver an atomic bomb over a different target than they are supposed to, after they get into the air?

For this is the covenant that I will make with the house of Israel after those days, saith the Lord; I will put my laws into their mind, and write them in their hearts: and I will be to them a God, and they shall be to me a people:

Hebrews 8-10.

THE FIRST PARTY

Representing the space people and the people of the United States, the First Party candidate for the office of President of the United States in 1960 is:

George W. Van Tassel.

Since the Republicrats and Democans have become one party, and of one policy, the people have not had any choice as to who to elect.

In the last four elections they have voted for "the lesser of two evils". The candidates placed before the people by the now second rate Republican Party and the third rate Democratic Party have always been the nominees of the special interests. Anyone listening to the proceedings of both parties in their nominating conventions can detect the selection of the nominees in secret caucus.

The Foreign policy of the First Party will be to put an end to the mash, cash, or bash policy of the present administration. The present policy of kiss-em-up, buy them off, or scare them out must cease if we are to maintain our standard of respect among other nations.

The policy of the First Party will be to discontinue the tax burden of foreign aid on the American taxpayer. History has proven many times over that the "friends" you "buy" always sell you out in a crisis.

The policy of the First Party will be to standardize domestic, commercial, and political tools. To equalize the rights of states, counties, and cities by federal law. To institute a 30-hour work week. To establish labor representatives as a part of The

Labor Department. To provide free enterprize in Agriculture and remove farmer controls. To remove the shackles from small businesses and penalize Trust collusions.

To eliminate the cost plus system in industry and permit the employees to spend their "spare" time outside of the factory. To discontinue all world wide "H" bomb tests by mutual inspection, and discontinue all atomic tests within the boundaries of the United States.

To release many new scientific devices for commercial and domestic use, that are now withheld by "security". To subsidize industries affected by this release.

To negotiate the removal of the U.S.-Canada border line, and form a United States of North America. To withdraw all "sitting duck" military bases from abroad and spend the cost of their present maintenance on an air tight defense system around the North American Continent.

To make the membership of any individual in any foreign party automatically cancel their United States Citizenship. To place major controversial issues before the people to vote upon in special elections.

To stop contributing to the weakness of small nations by supporting their politicians at the expense of the tax payer. To rearrange the tax scale to make the tax load equal on all people. To gradually institute the principle of energies for use and eliminate the sale of water, electricity and other natural forces.

To appoint farmers to Agricultural offices, Scientists to scientific positions, Economists to offices of finance, and keep the military career men out of administrative offices of government.

It is time to re-enstate the motto "In God We Trust" and put God's country back into the hands of Gods people.

For even when we were with you, this we commanded you, that if any would not work, neither should he eat.

2nd Thessalonians 3-10.

ANGELS LIKE PEOPLE?

Be not forgetful to entertain strangers: for thereby some have entertained angels unawares.
Hebrews 13-2.

This is part of the scripture of the New Testament in the Holy Bible. How could one entertain an angel unawares unless the angel looked like people here on the earth.

This is the thing that the people of today have maintained; that the space people look like us. Yes in the Bible it tells you angels are people so much like us that you can entertain them unawares.

Jesus looked like a man and mixed with the people of his time without their being aware that he was any different than them. Yet he said in St. John 17-14:

I have given them thy word; and the world hath hated them, because they are not of the world, even as I am not of the world.

Jesus said he was a visitor here. He denied that the world was his homeland. He said in St. John , 17-18:

As thou hast sent me into the world, even so have I also sent them into the world.

These are the space people, the "them" mentioned many times in the Biblical history of another time.

We who have spoken with them cannot be turned about. We know our course. Hebrews 12-25 says:

See that ye refuse not him that speaketh. For if they escaped not who refused him that spake on earth, much more shall not we escape, if we turn away from him that speaketh from heaven.

There are those who know and others that don't know. Neither can they find out with a closed mind.

UNIVERSALISMS

By

G.W. Van Tassel

Universalisms are the comes and goes that never arrive at a state of balance because of their reciprocating actions.

One's ability to judge good and evil is only possible if one reaches a state of stationary balance to observe from. One may think he is progressing rung by rung up life's ladder only to discover later that the ladder was sinking in the mud faster than the rate of climb.

It is these things that catch up with one that can be termed Universalisms. They are the unsensed workings of laws that are opposites of the sensed laws.

Before one can be sure of a gain on the ladder of life, he must first determine whether the ladder is secure on a stationary foundation. Then one must determine where he is on the ladder and which way is up, or down.

Universalisms make up in China, down in America. These are from a viewpoint in space where one can see the Earth as a globe. One can ride a swing back and forth through life for years but when he gets off the swing, he is still at the same point he was at when he got on it. Yet to one's sensing the laws of motion were active all the time.

Each time the Sun "comes up" in the morning we sense the Sun as coming up, but we do not sense the rotation of the Earth which made the Sun appear to "come up". The fact that we do not sense these motions is the result of humans trying to keep each other in darkness.

Sensing of darkness and light are a function of the mind, not the observation of day and night. Night is not dark, neither is day light. These are only sensed illusions, like watching a "motion" picture. The people and objects on the screen are

not moving. The sensed illusion of motion is created by interrupting the light that is projected through many continuous frames of still pictures on the film. The unsensed interruption of the light is the Universalism of the "motion" picture illusion.

In this modern world there are millions of people suffering from illusions, but because they are in the majority, the laws of sensing are established by their scale.

If a pig could talk it would insist that it's condition was clean and humans were dirty. The pig's point of view will not change the Universalism of unsensed law which says they are both dirty.

The dirty part of humans has nothing to do with their sanitary conditions. The sanitary conditions are observed because they are a sensed condition. The dirty part of humans is their minds. The pig has a clean mind in its' unsanitary condition.

Universalisms such as this apply to all of God's creatures on the Earth except humans. All of God's creatures, except humans, follow the unsensed laws by instinct.

Humans as part of the race of MAN were given dominion over all other creations on the Earth. Now humans have arrived at the point where they can undo all of the creations on this planet.

Why has this state of affairs been arrived at in one generation? Because humans have followed the illusions they have created for themselves for so many generations, handed down in dogma, custom, and creed, that these sensed creations are now masters of their creators.

The people are now in the pigpen they have built for themselves. They are confined and restricted and destroyed by their own creations. Slaves to the sivilization they have built by their senses. Ignoring all the unsensed laws of God. So set in their pig-headed course for generations, that they forgot to take a view of themselves from a point in space to determine whether they were on the way up or down.

Now they have arrived between the Devil and the Deep Blue Sea, because they have ignored the science of God's natural laws.

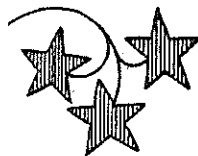

The world is split into two armed camps. Each has the power to eliminate not only the other camp but themselves. Each chides the other with the destruction they will retaliate with if the other makes a move.

The act of retaliation alone will eliminate them both. And still they both go on making more and bigger bombs, when each of them have admitted that they alone have enough bombs to kill off this humanity from radiation effects.

This is the beast in power. The governments of special interest. Satan's destructive interests. Even the most ignorant of people must now sense this. The time has now come to cast the agents of destruction out of power. The last chance to do it peacefully will be in 1960.

The unsensed laws of God are now in operation. Put in operation through the First Party. Man's party with God against destruction.

When the time comes don't fail to do your part.

COLLEGE PROGRESS

The status quo remains the same as it was before the Convention. Detailed parts for some of the research are being completed and we hope before long to print drawings of secondary energy devices in the "Proceedings". This will make it possible for others who are interested to carry the principles into other branches of research.

COMMUNISM AND SAUCERS

A recent article, by a columnist in a New York paper, is by implication trying to tie up the people who have made contact with the space people as communists.

This is another effort on the part of Satan's agents to scare the public out of having any thing to do with the people who profess contact with the space people.

I have always noticed that the communists are the first ones to call someone else a communist. This diverts the attention away from them.

Speaking for myself - George W. Van Tassel - I don't belong to anything - Communist, Democrat, Republican, Lodge, Labor Organization, or Church. I belong to my Creator, and all implications, or accusations by anyone are denied here and now. I don't need any fifth amendment, or fortieth amendment. I stand on God's laws and defy all comers who would smear me by any statement.

The press article implied that, because the contactees had all stated they were against atomic and "H" bomb tests, this indicated they were communists. The Americans that still have "red" blood in their veins better get enought of it circulating to stop all tests, or your childrens' children will be looking up at you from mutant bodies.

On August 11th, 1952, we wrote a letter addressed to Mrs. Dwight. D. Eisenhower, as the Next First Lady, four months before Ike was elected President the first time. We told her that her husband was going to be the next President. We also said in the letter that he would be the greatest President that ever lived, or the curse of every mother's heart. We never interpreted the "curse of every mother's heart" to Ike, or Mamie. I do this now.

Unless the "A" and "H" tests are stopped, Ike will be cursed by many mothers who are now children, because their babies will be mutants.

If Ike doesn't stop these tests, I intend to when I take over his job.

G. W. Van Tassel.

CONVENTION ECHOES

Again the press (the old fashioned method of disseminating narrow minded reporters' versions on paper) had it's usual slanted remarks after the Convention. Fortunately few people pay any attention to the opinions of the newspaper reporters anymore.

The Convention was attended by approximately 5000 people on Saturday, May the 11th, and about 7000 on Sunday, May the 12th. (These are Los Angeles newspaper estimates of the crowd size and probably the only thing they had approximately correct.)

Speaking on the two day event were Truman Bethurum, Orfeo Angelucci, Dan Fry, Harry Mays, Kelvin Rowe, Colvin Gurvin, Carl Anderson, Dana Howard, Peace Pilgrim, Howard Menger, Buck Nelson, Fay Clark, Hope Troxell, Ray and Rex Stanford, and yours truly.

We had a nice talk with Frank Scully Saturday night, although Frank didn't make it in time to speak to the people.

Rowe, Gurvin, Menger, Nelson and the Stanford boys, all told of contacts with the space people and of being aboard their ships. These people were speaking at the Convention for the first time.

The usual run of fakers tried to fool people with balloons, flares, etc., at night. So far as I know no space ships were sighted.

Parachute drops were made by Gordon Dallas and Hal Needham. Life and Esquire Magazine photographers covered the event and Long John from radio station W.O.R. in New York made tape interviews to play over his program.

In all respects the Convention was a success and we thank everyone who had a part in making it so.

BRITISH NUCLEAR TESTS

The present series of tests being conducted in the Pacific Ocean by the British are going to manifest more atmospheric and geophysical results. The fact that the tests are being conducted at Christmas Island is not only sacrilegious but the essence of absolute ignorance.

These megaton tests of "H" type devices are being conducted upwind from civilized cities only a few hundred miles away. Christmas Island is only a few hundred miles from Krakatoa, one of the worlds largest volcanoes. Christmas Island is also close to the fault line that circles the Pacific Ocean. It is opposite on the globe from the United States and to add to the ignorance of these tests, the United States is conducting tests at Yucca Flats in Nevada at the same time.

As a result of this, watch for extreme drops in temperature from 5 to 7 days after each British "H" test. Watch for more and larger hurricanes, tornadoes, etc. Watch for earthquakes in the U.S. in places where they are not normally recorded, and watch for a destructive one on the West coast.

It is evident that natives of Java and Borneo are being used as human guinea pigs to test radiation on humans.

This is also the first time "H" tests of megaton force have been conducted south of the Equator.

EXPRESSION OF THANKS

We who are endeavoring by the physical effort to bring the College to completeness, wish to thank all of the many people who are holding up the financial end of this great project. The continued extension of our varied efforts will soon be evident at the College property.

GRAVITY AND PARTICLE FOCI

Gravity being a differential pressure makes it applicable to all matter. As all matter is composed of atoms and all atoms are composed of particles, the trick in nullifying gravity is to get the particles focused.

As all of the atoms and their areas of activity are subject to primary energy, the problem is to get all of the particles to contribute their expression of energy in a given direction.

This has been accomplished several times by different methods of projection. The pyramid extension of line activity through discharge points is one method. The vibration of discs in resonance foci is another method. The insulation from gravity by vortices surrounding the object is another method. In all of these methods the particle foci must be given the chance to express itself voluntarily.

Using the time field for control in the vortice method permits the researcher to control gravity with the mind. As this method is tiring on the operator it must be used gradually to prevent nervous breakdown.

When the particles are brought into focus, like an army all charging at the same point, by the extension of line activity method, one has to watch for sudden termination of the force.

The resonance of sound method requires regular activation of the vibrations.

Each is suited for different purposes and can be merged to make a combination control.

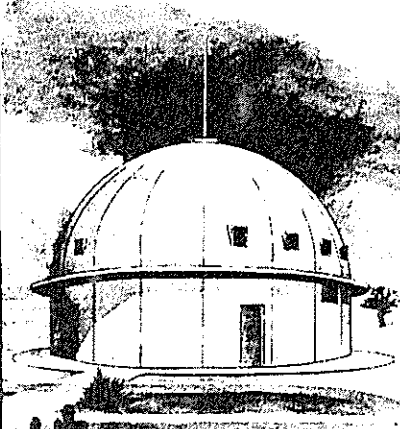

More will be given on this when further research is carried out.

NEW PHOTO

At the Convention, two fellows presented a picture to us of a U.F.O. over a race car at Palm Springs, California. We placed this photograph on display with many others and intended to reproduce it in this issue of the "Proceedings".

Unfortunately someone got sticky fingers during Sunday night and appropriated the picture. We had not written down the names of the two fellows that took the picture, because their names were on the back of the photo.

If anyone knows who these two men are, we would appreciate their names and addresses. We hope to get another copy of the picture from them and reproduce it in the next issue of the "Proceedings".
