The "Proceedings" is mailed free to those people who request it and financially support its printing by contributions. There is no subscription rate. All donations, checks, money orders, contributions and bequests should be made to the Ministry of Universal Wisdom, Incorporated.

"PROCEEDINGS" are published periodically by the Ministry of Universal Wisdom, Inc., at Yucca Valley, California. Printed in U.S.A. Business and Editorial offices: College Utility Building, George W. Van Tassel, Director; Darlene Jean Wing, Secretary-Treasurer; G.W. Van Tassel, Editor. All rights, including translation, reserved. Manuscripts and photographs from our members or friends must be accompanied by a self-addressed, stamped envelope. As we do not employ solicitors nor representatives, please address all correspondence concerning "Proceedings", contributions, donations, bequests, etc., directly to:

THE MINISTRY OF UNIVERSAL WISDOM, INC.

GRAVITY, CONDENSERS, AND GHOSTS

As a coil is the coupler between electricity and magnetism, so likewise the condenser is the coupler between electricity and gravity.

Gravity is a pressure generated by and composing all space. In order to overcome gravity it is necessary to insulate the object from gravity.

Gravity being predominantly negative in space, will naturally attract any positively charged body in the direction of the space charge.

People are basically a mass of chemical elements of negative polarity predominance gathered together to fill the positive polarity predominance of an electric form which is eternal.

Human bodies are combination batteries and condensers. Because the flesh polarity of the combined elements of the human body is negative polarity-wise, negative space gravity repels people and holds them against the planet. Their weight, or specific gravity (the push from space) is relative to the negative charge of their mass.

The reason heaven has always been referred to as up is because when your positively predominant electric body (spirit) departs from the flesh vehicle you acquired for the physical environment here, space negative polarity attracts it outwardly away from the planet.

Levitation only occurs when the electric body positive charge exceeds the negative charge of the flesh body.

Gravity is not the Earth charge attracting things to it. It is the charge of space rejecting or repelling things from itself. Life and death are alternating pulsations of polarity charges.

Heaven being up this Earth must be down, although most preachers would have you believe there is even a still lower place than this called hell. This is mostly because they subconsciously hate to admit they are here also.
The Biefeld-Brown effect is anti-gravity when the positive polarity electric charge exceeds the negative polarity charge of the mass.

Electricity, magnetism, and gravitation are three separate forces, yet each is dependent on the other to produce effects analogous to all of them.

The closer the plates of a condenser are to each other the greater the effect.

The higher the "K" or electric stress of the insulation between the plates the greater is the effect.

The greater the area of the plates of a condenser the more the effect will be. The more voltage on the plates will also give greater effect.

A free-to-move condenser will always move in the direction of the positive polarity side. The greater the mass of the material between the plates the greater will be the effect.

A charged condenser produces thrust without having any moving parts.

An anti-gravity field will collapse if it is within "grounding distance" of the Earth. This is roughly one-quarter of the diameter of the field.

In ion propulsion the frequencies in the orange spectrum will be found to produce maximum results.

Gravity will decrease as pressure proportionately relative to the charge of the mass of a body, or planet.

Control of gravity will be best effected at points of 120° of arc.

Electro-static sources such as the Van De Graaff and Wimshurst machines are required for anti-gravity research.

This article is being printed for those who are interested in the scientific aspects, to give you information you cannot get elsewhere.
SYMBOLS, SCIENCE, AND SENSE

In ancient times the scientists of the advanced civilizations, prior to this one, did their best to extend their knowledge for future inhabitants of the Earth. As in all cycles of repetition, each generation, or civilization thinks they are smarter than their predecessors. Dr. Du Bridge, the President of the California Institute of Technology, said recently, "If the knowledge of the centuries were all crammed into the head of one man, he would still be ignorant". This of course is on a relative basis compared to Universal Knowledge.

Today science creates formulas to express effects in a different way than the scientists of former civilizations did. The only real difference is that the records of the ancients were carved in stone. Knowing that a cyclic cataclysm was going to wipe out all temporary records they made permanent records in rock and in pyramids.

Today all records are in books, on magnetic tape, and other easily destroyed media. Of course the present military and economic trend forces everything to be hidden behind "security", so no one can use the knowledge without some one making money on it. Other things are hidden because they would upset the buy and sell profit system.

The ancient symbols have not been understood by the present civilization because they are viewed on a one dimensional plane, or the flat surface on which they were carved, painted, or printed.

If each symbol is viewed in the mind from three dimensional points, front, side, and top, they take on great significance.

Our research has discovered that there is a third dimension in electronics. The known electric and magnetic effects which are perpendicular to each other also have a "time field" which is perpendicular to both of them. This "time field" is responsible for the "wave motion" in electricity. The experts have not measured the "time field" because present instruments will not record its frequency. The "time field" is in the range of mind functions. Mind functions do not come in the "brain wave" categories now being measured.
Three dimensional mind functions would view a circle on this paper as thus\(\odot\), but seen from the top it would look like this\(\bigcirc\), and from the side would look like this\(\odot\). Make a circle out of a piece of wire, then look at it from the front, top, and side.

The circle and cross symbol would look the same from all three axis points of view. This can be done with three wire circles, thus: front, \(\bigcirc\); side, \(\odot\); and top, \(\oplus\).

What Einstein tried to describe as a "unified field" is actually the mis-alignment of these three fields from their mutual perpendicular positions to other angles. This can be done mentally with the mind (not the brain) as the "time field" is subject to thought manipulation. The brain does not think. It only registers electrically and magnetically from the time function of infinite, eternal mind.

Our five senses do not include a sense of time, yet you can estimate closely how much time has passed. This is a time function and is responsible for the impression that one day seemed to rush by, and another day seems to drag, because interest in one's activities, or lack of it, causes the brain to accelerate or decelerate time.

Measurements of the "time field" require special instrumentation because the "time field" has no motion relative to flux, polarity, or pressure.

The caduceus symbol used today by the medical profession is actually the symbol of a life principle. This symbol wound into a caduceus coil has already demonstrated rejuvenation effects in its use by Georges Lakhovsky, who published a book on the subject. The rejuvenated appearance of his patients was only recorded as a "side effect" of his original purpose. This can be seen in the pictures in a book written by Mark Clement, entitled, "The Waves That Heal", which can be bought from Health Research of Mokelumne Hill, California. This book is published by True Health Publishing Co., 152 Landor Road, Stockwell, London S.W.9, England.

The medical profession which has contributed so much to the world through the use of chemicals is fully aware of the great potentials of Radiobiology.
The Yin-Yang symbol of two teardrops chasing each other will look the same from the top or the side if they are drawn on a sphere. From the third point of view however the symbol will look like two diagonal lines. These diagonal lines represent an orientation of the third plane. As this is the original symbol of motion, it demonstrates that motion can only be achieved with mis-aligned, or unbalanced forces.

The Swastika will manifest motion by ion propulsion from an electro-static source rotating clock-wise with the ends in one direction, and counter clock-wise with the ends in the opposite direction.

Each of these ancient symbols can demonstrate a scientific principle if they are worked out on a three dimensional basis and applied in scientific manner.

The interpretation of the many symbols and their application scientifically in principle would have long ago given this civilization a more advanced science if the stubborn ego of narrow brains had not disregarded the facts.

CONVENTION AND AIR SHOW

We wish to announce that your Director, George W. Van Tassel, who operates Giant Rock Airport, 17 miles North of Yucca Valley, California, has set October 14th and 15th of 1961 for an Air Show and Spacecraft Convention.

This is a weekend and the public is invited.

This is a privately sponsored event and has no connection with "The Ministry of Universal Wisdom, Inc.," or its research branch, "The College of Universal Wisdom."
THE INTEGRATRON

We wish to keep our many readers informed of our steady progress on the Integratron. The correct pronunciation of this word is In-teg'-ra-tron.

This giant 38 foot high machine is actually the world's first "time" machine. It is 50 feet in diameter at the rim, which will carry a Wimshurst electro-static generator 55 feet in diameter. It is 9 feet, 4 inches from the ground floor to the second floor and 28 feet and 8 inches from the second floor to the top of the dome.

This entire structure is of nonmetallic construction, using no nails, bolts, screws, or metal in its fabrication. It is approximately six times stronger than standard commercial building codes require.

Electro-static, magnetic, and negative ion principles will be employed in its operation.

It is estimated that the manufacture and installation of the functioning parts will require from two to three years. Another year of operation will be necessary for tests and charting of results.

Its prime purpose is intended for the rejuvenation of people, but side effects of anti-gravity and time travel appear to be possible.

It will not be available for public use until all tests have been completed and proper authorizations for its use are secured.

We wish to thank all of our many readers for their gifts of money to help continue this vital project.

A. W. Van Tassel

10
MAGNETISM AND CANCER

We are reprinting an article from the New York Times newspaper of May 11, 1961. This is further evidence that our chemical, physical, bodies respond to causal corrections of the electro-magnetic effects as well, or better, than effect corrections of the physical bodies through chemicals and medical aids; although each has its place in science.

The Article

NEW CANCER CLUE

Diseased Tissue Is Found Less Magnetic Than Normal

WASHINGTON, May 10 (AP) -- The discovery that cancerous liver tissue in rats is less magnetic than normal tissue was announced today by the Interior Department.

Geological Survey officials said the finding provided medical men with another possible means of identifying malignant tissue and suggested a new avenue of approach toward arresting the spread of the disease.

The discovery was made by scientists at the Geological Survey, working with scientists of the National Cancer Institute. This is not the first time that magnetic fields have been used in the study of cancer, the report said.

It related that a few years ago Dr. J.W. Barnothy at the University of Budapest reported that in albino mice inoculated with certain types of cancer there was loss of tumor in five cases and complete recovery in four cases out of six for animals placed in a moderately high magnetic field. In contrast, control animals that were similarly inoculated and that were kept out of the magnetic field died.

FRONT PAGE PICTURE

On the front page of this issue of the "Proceedings" is pictured four of the original caduceus coils used in the original small scale research.
THE CURSE

"The earth also is defiled under the inhabitants thereof; because they have transgressed the laws, changed the ordinance, broken the everlasting covenant.

Therefore hath the curse devoured the earth, and they that dwell therein are desolate: therefore the inhabitants of the earth are burned, and few men left".  
Isaiah 24:5 and 6.

The curse of radiation from the bomb tests in the past is now becoming apparent in many ways.

Hellfire and damnation are now truly present for nothing is more burning or foul than the action of being eaten alive by malignancy. The world leaders who sanctioned the bomb tests are aware of what cannot now be undone and they are afraid the people will find out.

Everytime the atomic scientists meet they further downgrade the critical radiation level that humans may accumulate.

Oddly the scientifically advanced nations suffer the worst because they have long used X-Ray machines, and now have T.V. to increase their accumulation beyond the critical level, which is still not set.

"Cast your bread upon the waters and it will return."  
This is a law.

Radiation released by human ignorance is now returning through the body contact with fallout, drinking water, vegetation, meat, and fruit. Still we go on making reactors, atomic submarines, and atomic powered ships.

Prophecy says that one-third of the fish of the seas and one-third of the birds in the air shall die in the latter days.

Atomic wastes dumped in the sea, radio-active waters left behind submarines and ships, and island tests have already contaminated vast numbers of fish. Naturally, the birds that live on fish will die also.

Dr. Michael B. Shumkin of the National Cancer Institute is concerned with this problem. There is an epidemic of cancer now in trout. One of his colleagues said, "Today trout, tomorrow man." Cancer is already almost epidemic in humans.
In a Congressional report in 1960 by the then Senator John F. Kennedy, he stated that the United States had in its atomic stockpile 1,250,000 atomic bombs of the Hiroshima type, or larger. There are not that many cities in the world. This doesn't include the Russian, English, or French bombs. Still we go on making more and bigger ones because there is money to be made in manufacturing them.

The curse is truly upon the Earth's inhabitants, and madmen are in authority. Their philosophy is that everyone dies sometime anyway, so why not make plenty of money while we are here.

Their curse is about to descend on them, because what are they going to replace the credit cards with?

"And they shall throw their money in the streets."

Half of the trouble with the weather, juvenile delinquency, race hatred, and uncontrolled mobs in revolutions is the result of hard light penetration from the Sun; coming through our ionosphere that was blown full of holes by the "H" Bomb tests – and our scientists know this.

All of these results and many others are the results of the "curse" when humans created Sun effects on a planet.

"Because they have transgressed the laws" - of nature. "Changed the ordinances." The ordnance departments of the military used to stock weapons "within man's dominion on a planet" not Sun principle weapons. "Broken the everlasting covenant" which never gave man the privilege to ruin civilizations, blow up planets, or wreck Solar Systems.
THE FOURTH DIMENSION - MOTION

Much has been written about the fourth dimension. Spook chasers think it is an advanced plane of afterlife. Science fiction writers give it many mysterious and weird explanations. Einstein referred to the fourth dimension as "time".

Anything to be a dimension must be measurable. To measure something we much establish a reference point, or standards to measure from. To measure time on the Earth we have different time zones, because our measurements of the rotating motion of the Earth is relative to and based on the Sun. We should call the lighted time day and the dark time night. This of course varies with the seasons. We should call the 24 hour cycle a rotation instead of a day.

As a year "goes by" everytime the Earth goes once around the Sun, we should call this motion one orbit. The use of the words rotation and orbit instead of day and year would correctly define what actually takes place. Nothing "went by" relative to time, as time is an infinite ocean, like space, which is still and in which all things move.

Time concepts in the mind of individuals is variable, but motion can only be what it really is.

Science has established the Mach scale relative to the speed of sound. This varies with altitude and is worthless in space. The rotation and orbit of every planet is different. The movement of the entire Solar System is established as a motion relative to distant stars, which are also moving.

Thus we live in a constant series of illusions which have been mislabeled for centuries. This has established a standard, false, concept of time.

The Sun doesn't "come up" or "set". The Earth revolves to where these illusions relative to the horizon are apparent. A row of still pictures on a film run through a projector give us "motion pictures". Actually the only thing that is moving is the film through the projector. It is this concept of motion as time that brings on another illusion; that of age.
I have personally seen a woman 72 years old that "went crazy" at 25 years of age. She lost her concept of time and at 72 still looks 25 years old. This is evidence that "age" is the result of individual time concepts.

We live at roughly the same spot on the Earth all of our lives and because we accept the motions of the Earth as time, we get older.

Why should we get older because the planet we live on revolves on its axis and orbits around our Sun? The acceptance of these two motions by our minds makes "time pass".

Motion is the fourth dimension. It is the only measurable beyond the length, width, and thickness that is universal.

Every time you take a breath, or bend a finger, you change untold numbers of galaxies of atoms. This motion of the atoms does not make them any older.

When you can finally realize that this vehicle you drive called a physical body is not you, and that your spirit, or electrical self is ageless and that time is eternal, your flesh body will manifest youth, instead of age - regardless of the fact that it goes through many motions.

BOOKS

The books "Into This World and Out Again" and "The Council Of Seven Lights" are available at $1.50 and $5.50 respectively. These two books by Director G.W. Van Tassel may be ordered by mail, by addressing P.O. Box 458, Yucca Valley, California.
VISITORS

Our "Proceedings" readers and their friends are welcome to see the inside of the Integratron on any Saturday, or Sunday, at their convenience.

This privilege will be discontinued about November of 1961 due to installation of equipment.

Bring your camera if you wish to have pictures.
