Our 25th year of publication

MAN OF PRESENT

O mortal man of present,
discontinue looking on dead pasts;
Nor learn from history of other
bygone days
For that which is dead
should pattern no tomorrow.
Shed a mouldered ruin of yesteryear
and look to present living.
Set thy course to the future
that is yet to be.
Greater patterns as shape
the law of Life, and Love,
I give to three of Me
all in Love and Light.
Interest not yourself in ego,
bent for pleasure
Stumgle not in flocks that dwell
in ignorance of cause in making.
Rather, bend to set the style
and lead the way...
And flocks of sheep will follow,
for so... has man become.
So, by not thinking, or not knowing,
paths are bent to his destruction.
Rather to be reborn in Light
through efforts spent in Love.
So let Me take you by the hand,
to walk the narrow lighted way,
that tomorrow's sun may
be within thy vision evermore.

Message from the Golden Density

IT IS TIME

As we move directly into our rightful places here at The Ministry of Universal Wisdom, Inc., we are causing waves of truths to prevail under unique situations.

It is time for justice to move into right thought and in right action for all mankind. It is time all of us here on the project should be especially alert.

Today, we who know of our purpose on the planet Earth are alert and persistantly aware of our new opposition regarding the enlarged future of the Integratron.

Why...and why the Integratron? We who are of knowing, do know for certain the destiny of the Integratron cannot be changed. Our own patterns for survival on this planet are very much involved with this project and, from now onward, must keep that constantly in our balance.

The Integratron has been geographically placed in its' own present location to correlate with the World Energy Grid System (as so adequately explained by George W. Van Tassel and Bruce Cathie in that issue of Proceedings for October, November and December 1977). IMPORTANT? You should think so!!! It is time!

For many years it has been a pleasure and understanding to communicate with "Space Brothers" through many varied and important situations on this planet. These Beings have often guided from their realms when Earth man failed.

It seemed that certain forces tried to move in on our project with a control concept of world energy power. Power was one aim. THIS CANNOT HAPPEN. You are part of that reason. Be alert ... THINK... Communicate ... Balance true facts by direct communications and question - - - Is God in your action?

Lois Burbridge
Treasurer of
The Ministry of
Universal Wisdom

THE DOME

The INTEGRATRON is a non-metallic structure 38-feet high and 58-feet in diameter. This dome is an electrostatic magnetic generator with an amature over four times larger in diameter than any other in existence. The fields generated by this machine encompass its entire structure. This is why the dome does not contain any nails, bolts or metal in the assembly. The dome is six times stronger than the commercial building code requires and is held together like a Chinese puzzle.

The theory of the function of this giant machine is based on seven years of smaller research. It is designed to charge cell structure with energy. No healings of diseases are claimed in its operation.

The electromagnetic funtion is based on other research conducted over the past 50 years by other outstanding scientist, including, Tesla, Dr. A. D. Moore, Dr. George Crile and Dr. George Lakhovsky. Other funtions are limited to constructive biophysical phases of research indicated as important by the Space Being who gave an original to "Mer" many years ago and who continues their communications.

George W. Van Tassel - "Van" or "Mer" - as the Space People know him, is the primary builder of the Integratron. Through coordinative actions of many associate scientist around the world for nearly thirty years...this electro-dynamic wonder is nearly completed for testings.

It is good to know that the essential parts are not housed in the dome & will remain in their separated and appointed locations until the correct time for use within this hugh structure.

Associate scientist working with the Integratron Project realized that the Integratron is more than a functioning electrodynamic machine. Now, let's see some of the effects they had to appreciate in this phase of the research.

ELECTROMAGNETISM

Used in homes and industries (as in figures 1, 2, 3 and 4).

Demonstrating that a coil through a magnetic field generates a voltage across the coil terminals.

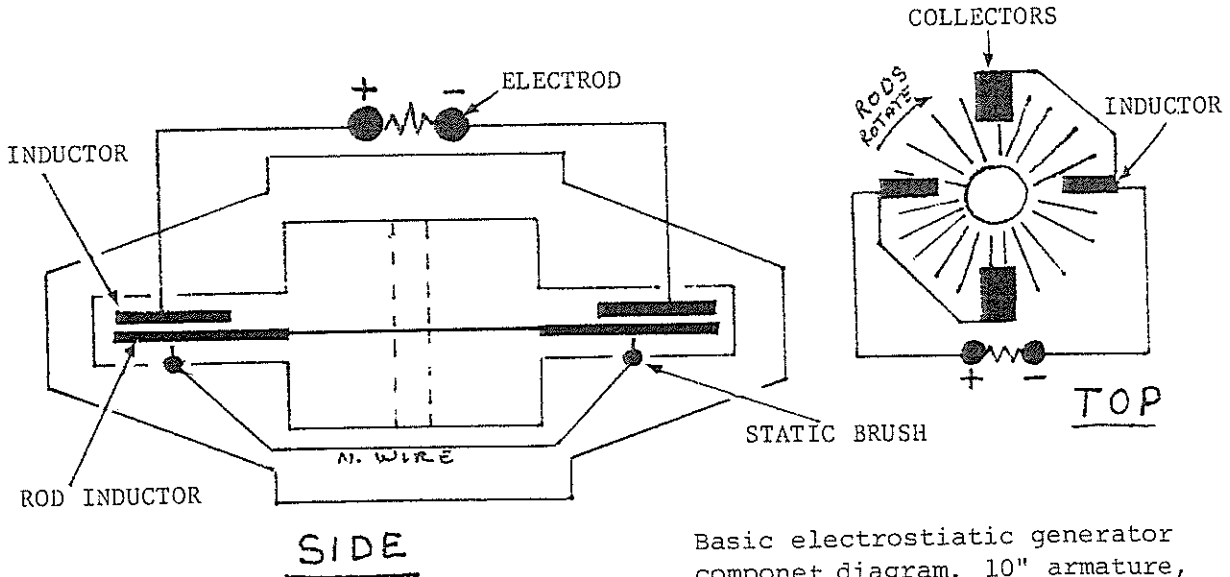

Magnetic lines of force inducing voltage in the second coil.

Essential components of a typical D-C motor. Also can be made to generate electricity.

ELECTROSTATICS

Generator, (Figs. 4, 5, 6) developed by Dr. A. D. Moore and explained completely in his book "Electrostatic Exploring, Controlling and Using Static Electricity" printed by Doubleday and Company, Inc., Garden City, New York.

Basic electrostatic generator component diagram. 10" armature, 32 inductor rods.

This generator is being used to charge coils, capacitors, etc. for basic research.

OPERATION PERFORMANCE:

Rotation speed clockwise top 1,200 R.P.M. top most KV 80-85. Approx: Micro-amps)8. (600 R.P.M., 20 KV.

This particular generator was designed and built by Bob Benson.

NEW LAWS OF MAGNETISM:

Measurement of the Earth's Magnetic Field:

The direction of flow of the field of magnetism that surrounds the earth is shown on the drawing of the world, old concept as traveling from the S pole to the N pole; see arrows indicating direction of flow. Many textbooks refer to the direction of flow from the two poles as from the N pole to the S pole. However, this is incorrect, and this new discovery can be supported by laboratory and space findings in the last few years.

The drawing shows a bar magnet having the conventional two poles. In the direct center of the magnet is the Bolch Wall, or the point of division of the circling vortex (spin) of electronic magnetic energies. The small arrows shown on the bar magnet indicate the direction of the spin of each pole's energies. The center of the magnet shows the phase change of the spins.

The north pole or negative spin is counterclockwise, or to the left. The south pole or positive spin is clockwise, or to the right. With the use of a straight bar of cylinder magnet we may then have access to the two separate forms of energy for our application of just that energy form and/or type. The illustration and discussion on this page is an outline of initial 1936 discovery.

PEOPLE ARE LIKE MAGNETS:

These electrometer measurements show measuring from one side of the body to the other. Example, from the right hand to the left hand; the other readings were made in the exact same way.

Fig. is a composit overlay to demonstrate magnetic relationship of the human body. Therefor positive and negative magnetic fields, have an effect on people.

It's A "L - Of - A - Mass"

The openmindedness of Joseph F. Goodavage makes his reportings to be of lasting value, as with an earlier article on cellular structure by Dr. Ravitz. We quote

"Cellular structure in certain parts of the human body is completely renewed every six months. It's the L-field, not the DNA molecule Dr. Ravitz explains, which molds the new material derived in part from food intake into the same design as the old. This explains why, eventhrough you might not see a friend for a year or more, during which time all the molecules of his face & head have completely changed he is recongnizably the same. Also, it explains why you can remember events of five, ten or fifteen years ago when every molecule of your brain has been replaced..perhaps half a hundred times". This proves that the spirit of mind holds the same pattern in figure and you are a reflection of yourself here in a matter environment."

We have explained in past issues of the "Proceedings" ... that "Time, Space and Being are the trinity of infinity". Time is absolute, Space is absolute and Being is the manifestation of all living things which live eternally somewhere in this universe forever.

"Your nervous system (for example) didn't develop from demands of a hostile terrestrial environment...as the theory of evolution states. Instead, it came into being as a result of the dynamic forces superimposed on the groups of cells by the total field pattern - your individual L-field."

"The indestructible quality of L-fields suggest:

a) that they are changeless; and, b) being changeless they do not get influenced by physical evolution. It is possible too that there is yet another area of being, another state or dimension where the Universe exists in a kind of Eternal Now...a 'timeless' condition. Our conception and even our experience in time may not be what our subjective senses tell us. "Time" might be apocryphal -- just one way of seeing reality. Thus an observer in an airplane for example, can see what the motorist below sees, but, in addition he can also see where the motorist has been and where he's going simultaneously."

If the 'past and 'future' are purely subjective, then they may coexist with the present. The L-fields are changeless because they appear to exist in another dimension, where all time...is 'now'.

"RE-QUOTABLE QUOTES"

"Many of your child's textbooks have as many wrong answers as right ones" (Ken Macrorie)

"Nature is medicine and medicine is a servant of nature"
(Ancient Apocrypha)

"May your lives continue to be enriched and nourished by the unfolding spirit within...and may your understanding of the Truth melt away all that which would delay your unfoldment."
(Hugh Barnes)

"Funny or peculiar that human nature will believe all the negative things one lays on it, but it will not own the higher ability of the spirit or soul."
(Steve Brown)

"Always, ALWAYS our good is more-is greater-than the trouble or the seeming evil that appears to dominate the situation at the moment we are going through it."
(Hugh Barnes)

"There are two expressions which require no translation...One, is the smile of a child; the other is the wag of a puppy'tail"
(D. O. Flynn)

Now we will take a look at our own body solar system - the earth and galaxy of which it is a part and the system of which all of our known cosmology is a portion. Refer to the diagram of the VELA SECTOR SYSTEM. Look for a minute dot...that is our earth complex; can you find yourself? How simple to ask it yet those tiny cell parts within us on that tiny dot represent as varied a plan within us as the planet, stars and other forms do out there in the omniverse, that even the Vela Sector System is only a small part!

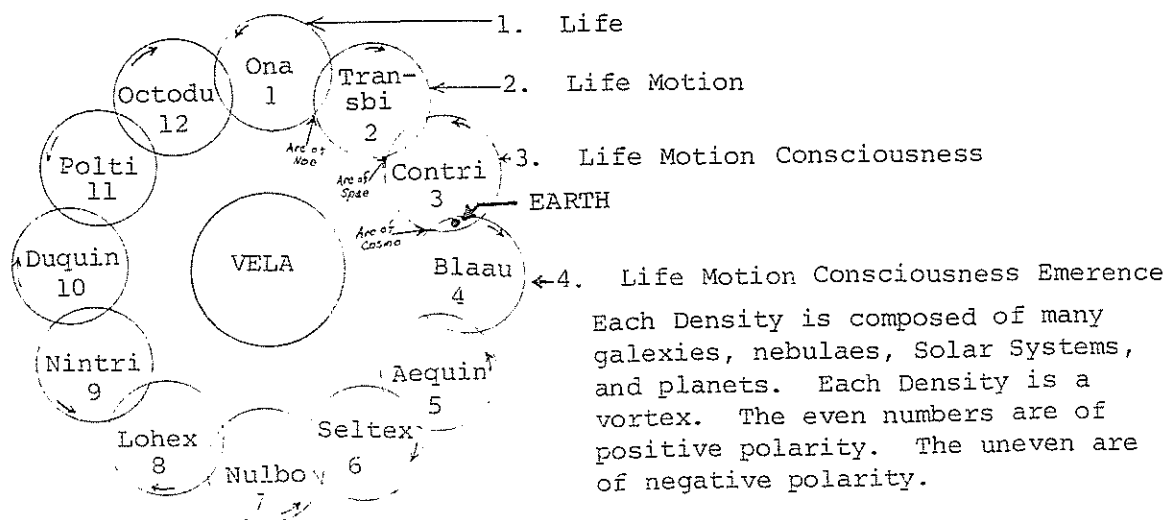

We can consider our earth-moon system like unto a huge atom of hydrogen with a nucleus (earth) in the center and the single electron (moon) in orbit. Then the earth and moon becomes an electron of an even greater system and so on add-infinitum. This macrocosmic atom structure extends infinitely beyond any comprehension we can share easily.

In the Sector System of Vela there are twelve Sectors; each Sector varies in its diameter the same as planets vary in their diameter, from 6 hundred thousand million light years across to over 22 hundred thousand million light years across. The Sector System of Vela then becomes an electron of an even greater system in space; the diameter of this greater system would require 32 minutes of our time to quote those figures in our light years.

According to our friends in space, who gave this information, they have found and know in full what our advanced minds call the forth dimension. Something we have not yet begun to fathom is the immensity of the universe, let alone the omniverse beyond it; a comprehension of such magnitude is less difficult for our Space Friends of the fourth dimension.

Progression is only recorded by change and so one who understands even his immediate environment is indeed a remarkable individual, while one who may live within it in calmness may indeed be a master.

VELA SECTOR SYSTEM
 Charactoristic of the first four Densities

' ' A Saturday Story ' '

Ellen Stern Harris—a member of the Board of Directors for Metropolitan Water District of Southern California, wrote a searching article on Sept. 8, -79, in the Los Angeles Herold Examiner. She tells of nuclear wastes threatening L.A. drinking water from spills out of New Mexico that dump into the Colorado River from processing plants. Some do not even have permits to discharge wastes !

We suggest many lessons can be learned. There is a need for responsible authorities. As many as 75 new uranium mines and other facilities similar to the one responsible for the July radio-active spill are anticipated. As yet no clear control is known to protect people in Colorado, Arizona, New Mexico and California from devastating radiation.

The Enviornmental Protection Agency details the spill site as reading 28 million pico curies per liter-- 500 pico curies per liter was allowed----Drinking water standards permit 18 pico curies per liter!! Are you listening ?

INTEGRATION STILL VAN TASSELS

Contrary to reports made by Velesques...the Integratron is still an asset of the Ministry of Universal Wisdom and is in good standing. Our position is sound. The attorney hired by us is a well recognized professional corporate attorney. In fact legal papers were served on the other parties and an action is underway to have the situation cleared by our Officers and board members.

The fact that such stuff was written and mailed was less amazing then that people believe it!! Without contacting the original and contuing owners by letter or other communication. It seems very sad to members of the board and friends who spell the name with love and understanding the same as George Van Tassel always did.

Is this a sign of the times? A craze for destruction...of ideas, or of character, and of truth as well?

At an Omniversal Meeting for spiritual discussion this weekend, a few of us discussed what are the meanings of reactions and angry responses? How does anger put a mark on the body? How does your action and thought show where you are living?
